COURSE CONTENT

Outcomes and Objectives:
Upon completion of the course, students will be able to:

1. Use a variety of stencil methods efficiently from the most direct to the highly technical.
2. Create fine art prints that reflect a more personal vision and a higher level of technical competence.
3. Demonstrate a personal direction of image-making, requiring greater skills and sophistication over a more sustained period of time.
4. Exemplify the proper and safe use of printmaking materials and tools.
5. Use printmaking terms and apply an understanding of their meaning.
6. Demonstrate an increasingly advanced understanding of form, color and composition, especially as it applies to printmaking and poster arts.

Repeating students will produce new designs each semester, building on both their skill level and knowledge of screen printing techniques.

Topics and Scope:

I. Composition and Design Concerns
  A. Identification of image goals in project proposal
  B. Selection of appropriate subject matter and image evolution for screen printing
  C. Simplified translation and image distillation for working design concerns of contrast and clarity
  D. Screening pictorial components toward a desired interpretation
  E. Applying color theory via the mixing of opaque and transparent inks
II. Materials for Screen Printing and Presentation
  A. Utilizing and maintaining a print workstation
  B. Employing papers on board stock for required results
  C. Mixing, application, and storage of inks
  D. Solvent use and screen reclamation
  E. Affordable print presentation and curatorial materials for storage

III. Screen Printing Preparation
  A. Hand application techniques of masking with fluids
  B. Paper or acetate stencil work
  C. Printing methods of monotype with crayons or brush
  D. Darkroom or digitally originated photo materials and related processes for integration
IV. Printing Functions
  A. Colored ink mixing with advanced theory and sophistication
  B. Complex color registration and over-printing challenges
  C. Printing on affordable alternatives and archival stock rag papers
  D. Gradual blends, split foundation, and other nuanced approaches and variants
V. Print Presentation Methods and Storage
  A. Print drying
  B. Signing, numbering, and dating impressions
  C. Matting, floating and framing
  D. Boxing for storage
  E. Presentation for clients and galleries
VI. Repeating students will produce new designs each semester, building on both their skill level and knowledge of advanced screen printing techniques.

Assignment:

A. Below are some of the suggested processes and concepts students will be asked to choose from. Subject matter may involve such things as self-portrait, landscape, still life, the figure, as well as non-objective compositional resolution.
 1. Photographic posterization
 2. Photostencil/progressive blockout combined
 3. Photographic image restructured/rearranged
 4. Full-color separations made digitally or by hand
 5. Halftone dot and photo mechanical tonal process
 6. Mechanical dot and pattern structures to develop pattern
 7. Multi-registration or shifting registration overlaps
 8. Hand application of color through stencils
 9. Mixed-media combinations, hand coloring, collage, other printmaking process
 10. Color as content-color interaction/relativity-Josef Albers, et al.
 11. Modular or repeated form/image building, tiling
 12. Sequential or serial imagery
 13. Thematic variation of a subject
 14. Color transparency overlaps to build an image
 15. The print as a 3-dimensional object (shaped, folded, combined)
 16. The poster as a fine art print

B. Project proposals and revisions

C. Portfolio

D. Class participation in discussions, critiques, and shop maintenance

Students repeating screen printing will be expected to produce a portfolio with work of more personalized expression

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Project proposals	Writing 5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Design development and preparations	Problem solving 35 - 40%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Execution of design and presentation of portfolio	Skill Demonstrations 20 - 40%

Exams: All forms of formal testing, other than skill performance exams.

None	Exams 0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

Class participation	Other Category 10 - 30%
