COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Select and cultivate varieties of warm season vegetables suitable for Sonoma County soils and microclimates.
2. Create appropriate planting layouts for warm season vegetables within the available planting space.
3. Plan and implement a schedule of cultural and cost effective practices from soil preparation through harvest for a warm season crop.
4. Develop a marketing plan and apply appropriate marketing strategies for profitable sale of a vegetable crop.

Objectives:

Upon successful completion of this course, the student will be able to:

1. Identify varieties of warm season vegetables suitable for Sonoma County soils and microclimates.
2. Describe soil preparation and fertility management methods for warm season vegetables.
3. Demonstrate proper techniques for seed planting in flats or direct seeding in ground.
4. Identify and evaluate planting layouts for warm season vegetables based on space and selected plants.
5. Determine optimal schedule and cultural practices for a warm season crop.
6. Identify and recommend control measures for common pests, diseases and weeds of warm season crops.
7. Prepare a cost and return estimate for vegetable crop production.
8. Identify options for marketing plans and strategies for warm season vegetable crops.

Topics and Scope:

- I. Warm Season Vegetable Varieties Specifically Suited to Sonoma County Conditions and Markets
- II. Soil
 - A. Conditions
 - B. Fertility
 - C. Amendments
- III. Production
 - A. Seed planting in flats
 - B. Seeding directly in ground
 - C. Quantities and spacing of varieties for desired yields
 - D. Planting layouts
- IV. Cultural Practices Through the Season
 - A. Thinning
 - B. Training/staking
 - C. Weed and insect control
 - D. Irrigation
 - C. Fertilization
- V. Harvest Methods and Storage
- VI. Economics of Production
 - A. Cost and return estimates
 - B. Crop budgets
- VII. Marketing
 - A. Market evaluation--outlets
 - B. Value-added products
 - C. Packaging, shipping, and display
 - D. Developing a marketing plan
 - E. Marketing strategies

Assignment:

Representative assignments:

1. Reading: approximately 10-20 pages per week.
2. Planting layout for a given planting space.
3. Planning calendar of cultural practices for selected crop.
4. Report (2-4 pages) identifying and recommending control measures for pests, diseases, and weeds common to warm season crops.
5. Crop budget plan.
6. Outline a marketing plan (2-3 pages).
7. Lab: Skill demonstrations on site, including seed planting; application of cultural practices; pest and weed identification.
8. Final exam or project.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Report

Writing 10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Planting layout; calendar; budget; marketing plan.

Problem solving
35 - 50%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Lab skill demonstration activities

Skill Demonstrations
30 - 40%

Exams: All forms of formal testing, other than skill performance exams.

Final exam/project

Exams
10 - 20%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
