COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply the tools of supply and demand to assess equilibrium of price and quantity in competitive markets.
2. Assess the nation's economic performance based on GDP, unemployment and inflation.
3. Utilize the tools of fiscal and/or monetary policy to return the economy to full employment.

Objectives:

At the conclusion of this course, the student should be able to:

1. Apply economic principles such as opportunity cost, finite resources, and trade-offs to students' everyday lives where spending, working, and saving decisions are concerned.
2. Articulate a vision of the global economy as a means by which individuals worldwide can be made better-off through the use of markets and the rational allocation of finite resources.
3. Synthesize the ideas of past and current economic theories and formulate their own perceptions of how best to address the fundamental economic questions of what, how, and for whom.
4. Apply market theory principles to help understand the potential role of government in the economy.
5. Apply discipline-specific research tools to economic data.

Topics and Scope:

- I. Foundations of Economics
 - A. the economic problem: scarcity
 - B. production possibilities curves
 - C. comparative economic systems
- II. The Market Economy
 - A. the circular flow of capitalism
 - B. mixed capitalism

- A. the model of aggregate demand-aggregate supply
- B. stagflation: a dilemma for demand-side economics
- C. supply-side external stocks
- D. tenets of supply-side economics

IX. Economic Growth and Development (Optional)

- A. the classical growth model
- B. the Malthusian Specter
- C. technological change and productivity
- D. growth and productivity projections for the U.S. economy
- E. relationships between international trade development and population growth

X. Orientation to the values, themes, methods and history of the discipline both nationally and globally

XI. Identification of career objectives related to a course of study in the major

XII. Introduction to discipline-specific research tools, major indexing sources, standard reference tools, discipline-specific tools and major web sites, for both national and global economics

Assignment:

1. Read and study appropriate chapters in text (15-20 pages) per week
2. Approximately 3 homework problem sets to be prepared for review and discussion
3. Two to four in-class, closed-book, no-notes, examinations/quizzes including a final.
For online classes, examinations/quizzes will be taken online
4. Written assignments and chapter questions

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, research

Writing
5 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems involving computation and graphing

Problem solving
10 - 40%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Examinations/Quizzes including a final, multiple choice exams, essay exams

Exams
50 - 80%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%

Representative Textbooks and Materials:

Principles of Macroeconomics. 2nd ed. Coppock, Lee. and Mateer, Dirk. W. W. Norton & Company. 2017
