COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Demonstrate accurate analysis of state wide epidemiological reports on chronic and infectious diseases in California.
- 2. Critique aspects of lifestyle changes that can prevent or reduce the prevalence of chronic and infectious diseases.
- 3. Analyze how models of lifestyle behavior change can be incorporated in individuals and in the

community.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Define important foundational concepts in community / public health.
- 2. Identify different public health disciplines, professions and organizations, and explain how each contributes to the field of public health.
- 3. Describe the historical development of public health including the most important achievements of public health.

- 4. Distinguish the difference between personal and public health.
- 5. Distinguish how public health differs from the traditional Western medicine approach to treating disease and illness.
- 6. Demonstrate the use of basic epidemiological methods, such as the analysis of rates, and the definition of cases, population at risk, risk factors, incidence, prevalence, morbidity and mortality.
- 7. Outline strategies for prevention, detection and control of infectious and chronic diseases.
- 8. Outline the process of of community organizing, building and health promotion programming.
- 9. Describe the interplay between health determinants, such as environmental conditions, social, behavioral and cultural factors, and biological considerations, and explain the role of each in determining local, national and global health organization and policy.
- 10. Analyze current public health issues and describe how they affect societal well-being among specific populations of age, sex, ethnicity, minority, education and socioeconomic status.
- 11. Describe the organization, financing and delivery of various medical and population-based services in the U.S. healthcare system.
- 12. Identify, assess and utilize credible information resources on community health current issues, such as the internet, social media, media outlets, and libraries.
