COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Provide safe, high-quality nursing care that meets the needs of maternal/child and pediatric patients.
2. Use the nursing process to apply concepts of the normal progression of growth and development to pediatric patients.

Objectives:

At the conclusion of this course, the student should be able to:

1. Recognize situations where patients are at high risk for harm, and use agency-developed procedures to protect them.
2. Analyze patient needs across the life span using the nursing process and focusing on the family as a whole system.
3. Identify high priority care needs of patients with selected illnesses.
4. Collaborate with patients, families and other members of the healthcare team to provide patient-centered care.
5. Incorporate physiological, developmental, psychological, and adaptation concepts into the development of a nursing care plan.
6. Articulate the scientific rationales for selected nursing and medical interventions.
7. Demonstrate competency in the performance of nursing skills, incorporating scientific, physiological and psychosocial principles.

8. Use prioritization and time management skills to organize care for:
 - a. Mother-baby couplets
 - b. Pediatric patients
 - c. Labor and delivery patients
 - d. Intensive care nursery patients

Topics and Scope:

I. Theory

A. Pediatric Nursing

1. Perspectives in the nursing care of the pediatric patient*
2. Assessment of child and family*
3. Growth and development*
4. Child and family with special needs
5. Child with problems related to
 - i. oxygenation and nutrition
 - ii. blood production and circulation
 - iii. disturbance of regulatory mechanisms
 - iv. physical mobility

B. Perinatal Nursing

1. Normal post-partum patient*
2. Normal neonate*
3. Normal laboring patient*
4. Normal pregnant patient
5. Normal reproductive patient
6. Alterations in pregnancy
7. Alterations in normal birthing process
8. Neonate at risk*
9. High risk post-partum patient
10. High risk post-partum/gynecological patient

*These items are introduced in lecture, and the related skills are performed in the lab

II. Skills

- A. Prenatal care
- B. Labor and delivery care
- C. Postpartum care
- D. Neonatal care within the Neonatal Intensive Care Unit (NICU)
- E. Pediatric care
- F. Simulation lab experience

III. Clinical - Clinical application of maternal-child and pediatric nursing practice in the hospital setting. Standard care and pharmacotherapy.

Assignment:

Lecture-Related Assignments:

1. Reading 70-100 pages per week.
2. Pediatric community health presentation (ungraded).
3. Growth and development observation report (ungraded).
4. Unit and standardized exams: 4-6 per semester. Minimum cumulative score of 75% on four unit exams to continue in the nursing program.

Lab-Related Assignments:

1. Reading prior to nursing skills demonstration 15-50 pages per skill.
2. Practice with high risk maternal-child and pediatric care and skills performance in simulated lab (ungraded).
3. Completion of skills lab quizzes 1 per skill (ungraded).

Clinical-Related Assignments:

1. Completion of the safe medication dosage calculation exam with a score of 95% or better by the third attempt. This assignment is not graded for purposes of this course, but failure to pass this assignment with a grade of 95% or better on the third attempt will result in a failed grade and dismissal from the nursing program.
2. Clinical maternal-child and pediatric nursing practice in hospital and clinic settings (two 8 hour days per week) with critical thinking application. Students must meet minimum problem-solving skills and performance standards to pass this course. Provide safe care to 1-2 maternal-child couplets, 1 NICU patient, 1 perinatal patient or 1 pediatric patient as assigned by the clinical instructor each clinical shift. Rubric graded: Pass/Fail. Achieving a pass in clinical practice is required to remain in the nursing program.
3. Participation in case conferences for analysis of patient care situations in group setting each clinical shift.
4. Develop clinical concept map based on assigned patient cases and promotion of quality patient outcomes. Rubric graded: Achieve score of 75% or better.
5. Preparation and participation in 4 simulation lab scenarios (ungraded).
6. Complete 3 critical thinking journal entries (ungraded).
7. Maternal-child or pediatric topic oral presentation (ungraded).

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Concept map

Writing
10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Clinical patient care: pass/fail, case conferences and analyses

Problem solving
15 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Skills performance, participation, and attendance

Skill Demonstrations
15 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Unit and standardized exams

Exams
40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
