COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Use major psychological theoretical perspectives to explain human behavior.
- 2. Identify the major scientific research methods, and use the critical thinking process to assess research materials and methods.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Define psychology; outline its historical roots; identify what psychologists do; and apply the critical thinking process to psychological phenomena and research outcomes.
- 2. Describe and apply with examples the various psychological research methods used to study behavior; include description of case studies, naturalistic and laboratory observations, correlational studies, surveys and tests, the experimental method, and longitudinal and cross-sectional studies.
- 3. Diagram the structure of the brain and its neuron cells; include descriptions of hemispheric specialization, location of important structures and their functions, and male/female differences.
- 4. Discriminate among the following body rhythms and mental states: circadian rhythm and the

- sleep cycle, infradian rhythm and the premenstrual cycle, and ultradian rhythm and the stages of dream.
- 5. Analyze the processes of sensation and perception and relate how abilities, beliefs, and emotions can affect sensory perception.
- 6. Summarize the principles of classical conditioning, operant conditioning, and social-cognitive learning and apply these principles when explaining the origins of phobias, fetishes, and aggression.
- 7. Determine how societal roles and rules, authority figures, and group opinions and behaviors affect an individual's opinions, actions, and emotions; generate a plan on how to decrease stereotypes, prejudice, and discrimination.
- 8. Distinguish among the different theories of intelligence, including Sternberg's Triarchic Theory of Intelligence and Gardner's Theory of Multiple Intelligence.
- 9. Discuss how the body, the mind, and culture influence the experience and display of emotions; assess the components of stress and describe how to cope and manage stressful events.
- 10. Compare and contrast the following theories of personalities: biological (genes and heredity), environmental (parents, peers, situations), cultural (values and traits), psychodynamic (unconscious conflicts and desires), and humanistic (present inner self).
- 11. Analyze and describe the following categories of psychological disorder: anxiety disorders, mood disorders, eating disorders, personality disorders, dissociative disorders and schizophrenia.
- 12. Apply the following treatment strategies and therapeutic styles to their appropriate psychological disorders: lobotomy, Electroconvulsive Therapy (ECT), antianxiety, antidepressant, antipsychotic,

psychodynamic, cognitive-behavioral, behavioral, humanistic, group, and family.

Topics and Scope:

- I. Introduction to Psychological Theories
- II. Psychology Research Methods
- III. Evolution, Genes, and Behavior
- IV. Neurons, Hormones, and the Brain
- V. Body Rhythms and Mental States
- VI. Sensation and Perception
- VII. Learning and Conditioning
- VIII. Behavior in Social and Cultural Context
- IX. Thinking and Intelligence
- X. Memory
- XI. Emotion
- XII. Motivation
- XIII. Theories of Personality
- XIV. Development over the Life Span
- XV. Health, Stress, and Coping
- XVI. Psychological Disorders

Assignment:

- 1. Read approximately 35 pages per week
- 2. Writing assignment that may include research, experiential, response, or project for a minimum of 1,250 words
- 3. Quizzes, exams, and a final
- 4. Oral presentation and/or group project may be assigned

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research, experiential, response, or project paper

Writing 30 - 60%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, Exams, and a Final

Exams 40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

Oral presentation and/or group project

Other Category 0 - 10%
