COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Utilize a digital audio workstation (DAW) to produce master audio tracks for multimedia applications, including film, video, gaming, digital broadcasting, compact disc, and DVD.
- 2. Critically analyze and aesthetically evaluate audio for multimedia applications.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Describe the various jobs and careers available in the Digital Audio industry.
- 2. Demonstrate hands-on proficiency with a DAW at an advanced level.
- 3. Explain the critical issues in the digital recording and broadcast of the speaking voice, including dialog, voice-overs, and narration.
- 4. Create, edit, and master digital audio content suitable for multimedia applications, including video and film.
- 5. Create, manage, and integrate an audio asset list for interactive media and video gaming.
- 6. Assess and implement the technical processes involved in Internet audio delivery and podcasting.
- 7. Demonstrate the technical processes involved in audio postproduction.
- 8. Explain the mastering process.

Topics and Scope:

Lecture Topics:

- I. Overview of the Digital Audio Industry
 - A. Jobs and careers in Digital Audio
 - B. Industry resources and organizations

- II. Audio for Spoken Word
- III. Audio for Video and Film
 - A. Sound design
 - B. Sound effects (SFX)
 - C. Music underscoring
 - D. Aesthetic issues in video/film audio
- IV. Synchronization and Transfers
 - A. SMPTE (Society of Motion Picture and Television Engineers) time code
 - B. MIDI-based synchronization
 - C. Proprietary synchronization systems
- V. Audio for Interactive Media and Video Gaming
 - A. Linear vs. non-linear audio
 - B. Data size budgeting
 - C. Asset list creation, management, and integration
 - D. Use of middleware
 - E. Dataflow programming for Interactive Audio
- VI. Creating Sound Effects for Multimedia
- VII. Internet Production
 - A. Data transfer networks
 - B. Fidelity and digital file formats
 - C. Acoustic masking (perceptual coding)
 - D. Online collaborative recording
 - E. Podcasting
- VIII. Postproduction
 - A. Advanced editing
 - B. Music mixing
 - C. Surround sound
 - D. Premixing and rerecording for TV and film
 - E. Mastering for CD and DVD
 - F. Evaluating the finished product
- IX. Synthesis in Sound Design
 - A. Layering real world SFX with synthesized sound
 - B. Styles of design
- X. Best Practices for Productions

Laboratory Topics:

- I. Advanced-Level Usage of the Digital Audio Workstation (DAW)
- II. Creating, Managing, and Integrating Audio Asset Lists for Interactive Media and Video Gaming
- III. Producing a Final Mixdown for Various Platforms
- IV. Digital Audio Projects (such as):
 - A. Producing radio spots with music beds, voice-overs, and SFX
 - B. Scoring short films with music and SFX
 - C. Producing podcasts and preparing audio for online delivery
 - D. Building a MIDI/RIFF file to video game spec
 - E. Copying a film score texture
 - F. Organizing a personal SFX library following accepted naming conventions
- V. Mastering a Final Mix to Industry Standards

Assignment:

1. Reading (10-20 pp. per week) from the text, handouts, and/or online tutorials

- 2. Hands-on proficiency demonstrations (3-5) on the hardware and software
- 3. Quiz(zes) (1-3) on course topics (multiple choice/short answer/essay as needed)
- 4. Completion of required laboratory hours
- 5. Digital audio projects based on the laboratory topics above, with a peer review process
- 6. Final digital audio project designed in consultation with the instructor

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Digital audio projects

Problem solving 40 - 55%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Hands-on proficiency demonstrations

Skill Demonstrations 25 - 35%

Exams: All forms of formal testing, other than skill performance exams.

Ouizzes

Exams 10 - 25%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation, lab hours

Other Category 5 - 10%
