Total Out of Class Hours: 140.00 Total Student Learning Hours: 210.00

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

Catalog Description:

Survey of fundamental algebra topics, probability and exploratory data analysis needed to prepare students for transfer-level statistics and liberal arts mathematics courses.

Advisory: This course is NOT intended for math, science, computer science, business, or engineering majors.

Prerequisites/Corequisites:

Completion of MATH 150 or MATH 151 or MATH 150B or AB705 placement into Math Tier 1 or higher

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: Survey of fundamental algebra topics, probability and exploratory data analysis needed to prepare students for transfer-level statistics and liberal arts mathematics courses.

Advisory: This course is NOT intended for math, science, computer science, business, or engineering majors. (Grade or P/NP)

Prerequisites/Corequisites: Completion of MATH 150 or MATH 151 or MATH 150B or AB705 placement into Math Tier 1 or higher

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Create linear and exponential models using real world data in the context of application problems.
- 2. Find and analyze summary statistics for categorical and quantitative data.
- 3. Create and analyze graphical representations for categorical and quantitative data.
- 4. Create and interpret functions graphically, verbally, and algebraically.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Evaluate, apply, and simplify algebraic expressions.
- 2. Use linear expressions, equations, and inequalities in application problems.
- 3. Produce data through random sampling and analyze the data collected.
- 4. Analyze real data sets by finding measures of central tendency, position, and spread, and by constructing various charts and graphs.
- 5. Use data to calculate and analyze the slope, y-intercept, and equation of a line in two variables and construct a graph of the linear equation and regression line.
- 6. Apply linear and exponential functions for regression analysis to solve application problems.
- 7. Solve and analyze basic probability problems using ratios, proportions, two-way tables and percentages.

8. Consistently apply effective learning strategies for success in college.

Topics and Scope:

- I. Arithmetic Operations, Formulas and Algebraic Expressions
 - A. Arithmetic of signed numbers and interpretation of inequalities
 - B. Operations with fractions, proportions, ratios and percent
 - C. Measurement and unit conversion
 - D. Exponents, square roots, scientific notation
 - E. Order of operations and simplifying algebraic expressions
 - F. Evaluating formulas
 - G.Introduction to Sigma Notation
 - H. Introduction to Factorials

II. Exploratory Data Analysis

- A. Quantitative versus categorical data
- B. Collecting data
- C. Frequency and relative frequency tables
- D. Constructing and reading bar charts, dot plots, and histograms
- E. Measures of center: mean and median
- F. Measures of spread: range and standard deviation
- G. Quartiles and box plots

III. Linear Equations and Inequalities

- A. Solving general linear equations with application problems
- B. Solving formulas with application problems
- C. The rectangular coordinate system and plotting ordered pairs
- D. Graphs of linear equations
- E. Find and interpret slope, rate of change and y-intercept
- F. Writing, solving and graphing one-variable linear inequalities

IV. Functions

- A. Function notation, models and applications
- B. Graphing various functions, models and applications
- C. Constructing and analyzing scatterplots
- D. Regression line, prediction and interpretation

V. Exponential Functions

- A. Integer and rational exponents
- B. Exponential functions and their graphs
- C. Exponential growth and decay
- D. Exponential regression, prediction and interpretation
- E. Introduction to logarithms

VI. Probability

- A. Introduction to probability, notation and rules
- B. Conditional probability
- C. Probability and proportions calculated from two-way tables
- VII. Technology Use of Technology (Calculator or Computer Software) to Evaluate Formulas, Calculate Probabilities, Analyze Data, and Find Statistics

VIII. Topics Related To Developing Effective Learning Skills

- A. Study skills: organization and time management, test preparation and test-taking skills
- B. Self-assessment: using performance criteria to judge and improve one's own work, analyzing and correcting errors on one's test
- C. Use of resources: strategies identifying, utilizing, and evaluating the effectiveness of resources in improving one's own learning, e.g., peer study groups, computer resources, lab resources, tutoring resources

Assignment:

- 1. Reading outside of class (0-60 pages per week)
- 2. Problem sets (1-8 per week)
- 3. Quizzes (0-4 per week)
- 4. Projects (0-10)
- 5. Exams (2-6)
- 6 Final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Problem sets

Problem solving 5 - 20%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Exams and quizzes

Exams 70 - 95%

Other: Includes any assessment tools that do not logically fit into the above categories.

Projects and participation

Other Category 0 - 10%
