Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CULT 250

Catalog Description:

The basic principles of food safety and sanitation and the application of these principles in a food service operation. Includes instruction on sanitation regulations and personal hygiene, contamination sources, microorganisms and conditions for growth, proper food handling techniques and storage, development of a comprehensive cleaning and sanitizing program to prevent foodborne illnesses, and basic concepts of workplace safety. Upon completion students will be prepared to take a nationally recognized exam.

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100 or appropriate placement based on AB705 mandates

Limits on Enrollment:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Demonstrate knowledge of sanitation regulations and personal hygiene.
- 2. Identify and describe contamination sources, microorganisms and conditions for growth.
- 3. Describe a comprehensive cleaning and sanitizing program to prevent food borne illnesses.
- 4. Recognize basic concepts of workplace safety.
- 5. Successfully complete a final exam equivalent to a nationally recognized exam.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. State the potential economic impact and distress caused by food borne illness.
- 2. State the importance of food safety and sanitation as the basis for preventing food borne illness.
- 3. Identify and describe the characteristics of potentially hazardous foods.
- 4. Define the food safety terms: contamination, food borne illness, and outbreak.
- 5. Identify the populations especially at risk of contracting a food borne illness.
- 6. Identify the three classes of food borne illness and discuss how each causes disease.
- 7. Identify the major types of potentially hazardous foods and the risk factors common to these foods.
- 8. Describe methods to prevent biological, physical, and chemical contamination of food.
- 9. Determine when to accept and reject different types of foods based on proper purchasing and receiving procedures.
- 10. Calibrate thermometers and demonstrate correct use.

- 11. Recognize codes and symbols used to designate food products that have been inspected by governmental agencies and coming from approved sources.
- 12. Explain the importance of purchasing and storage management in relation to sanitary food service.
- 13. Describe proper storage of foods to prevent cross contamination and maximize safety.
- 14. Describe time and temperature controls in each step of the flow of food including defrosting, cooking, holding, and serving.
- 15. Demonstrate methods of preventing food-borne illness based on poor personal hygiene and hand contact.
- 16. List the characteristics of materials, designs of facilities, and equipment for sanitary operation.
- 17. Demonstrate principles and proper procedures for sanitizing various materials, equipment, and utensils by both manual and mechanical means.
- 18. Identify ways to prevent pest infestation and methods of pest elimination.
- 19. Describe the roles and activities of the government offices involved in safe food production, distribution, and marketing with respect to controlling food-borne illnesses.
- 20. Describe HACCP (Hazard Analysis Critical Control Point System) in various food handling/service operations.
- 21. Identify common safety hazards.
- 22. Describe how to prevent and treat various accidents that can occur in foodservice and list emergency procedures.
- 23. Maintain high standard of personal cleanliness and hygiene.

Topics and Scope:

- I. Microorganisms
 - A. Classification
 - B. Growth requirements
 - C. Transmission routes
- II. Description and Methods of Controlling Food Borne Illnesses
 - A. Viral-caused
 - B. Chemical-caused
 - C. Parasitic-caused
 - D. Bacteria-caused
- III. Personal Sanitation Importance and Techniques
 - A. Maintaining high standard of personal cleanliness and hygiene
 - B. Mandating high standards of personal cleanliness and hygiene
- IV. Application of Sanitation Knowledge (HACCP)
 - A. Food receiving
 - B. Food storage
 - C. Food preparation and service
- V. Basic Concepts of Workplace Safety
 - A. Description of common accidents in food service
 - B. Prevention and treatment
- VI. Responsibility for Understanding and Maintaining Regulations and Standards
 - A. Sanitation
 - B. Safety

Concepts presented in lecture are applied and practiced in lab.

Assignment:

Lecture-Related Assignments:

- 1. Weekly reading assignments (20-30 pages)
- 2. Weekly worksheets
- 3. Two to three web research assignments (1-2 pages)
- 4. One to three writing assignments
- 5. Three to four quizzes
- 6. Practical final exam (written portion included)

Lab-Related Assignments:

- 1. Two food service inspections using a checklist to evaluate for safety and sanitation
- 2. One thermometer calibration assessment
- 3. One three-compartment sink set-up

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Web research assignments, writing assignment

Writing 5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Worksheets

Problem solving 20 - 35%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Food service inspection, thermometer calibration assessment, demonstrate setting up a three-compartment sink

Skill Demonstrations 5 - 15%

Exams: All forms of formal testing, other than skill performance exams.

Ouizzes and Final Exam

Exams 40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category 0 - 0%
