## Catalog Description:

In this course, students will review the core prerequisite skills, competencies, and concepts needed to succeed in precalculus algebra. Intended for students who are concurrently enrolled in Precalculus Algebra (MATH 25). Topics include concepts from elementary and intermediate algebra that are needed to understand the basics of precalculus algebra.

## Prerequisites/Corequisites:

Concurrent Enrollment in MATH 25

## Recommended Preparation:

Course Completion of CSKLS 372 ( or CSKL 372) and CSKLS 373

## Limits on Enrollment:

## Schedule of Classes Information:

Description: In this course, students will review the core prerequisite skills, competencies, and concepts needed to succeed in precalculus algebra. Intended for students who are concurrently enrolled in Precalculus Algebra (MATH 25). Topics include concepts from elementary and intermediate algebra that are needed to understand the basics of precalculus algebra. (P/NP Only)

Prerequisites/Corequisites: Concurrent Enrollment in MATH 25

## COURSE CONTENT

## Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply effective learning strategies for success in college.
2. Simplify and perform operations on expressions involving radicals, exponents, and polynomials.
3. Graph and formulate linear equations in two variables.
4. Solve linear, polynomial and radical equations and linear inequalities in one variable.
5. Analyze functions and solve equations and inequalities using graphing technology and algebraic methods.
6. Solve systems of linear equations and inequalities in two variables.
7. Create mathematical models and solve applications of linear and nonlinear functions.
8. Simplify, operate, graph and solve equations and applied problems involving rational, exponential, logarithmic, and absolute value functions at the intermediate algebra level.

## Objectives:

At the conclusion of this course, the student should be able to:

1. Apply effective learning strategies for transfer level mathematics.
2. Solve linear equations and inequalities in one variable.
3. Evaluate and solve literal equations.
4. Graph linear equations and inequalities in two variables.
5. Find an equation for a line given information about the line.
6. Perform the operations of addition, subtraction, multiplication, division, and factoring of polynomials.
7. Use the laws of exponents to simplify expressions involving rational exponents.
8. Solve linear systems of equations in two variables using the methods of substitution, addition, and graphing and find graphical solutions to systems of linear inequalities.
9. Solve application and modeling problems that require the use of a system of linear equations.
10. Simplify, add, subtract, multiply and divide radical expressions.
11. Define function, domain, and range, and use function notation.
12. Identify basic features of the graphs of linear, polynomial, and radical functions.
13. Use graphing technology to construct graphs and use to solve nonlinear equations and inequalities in one variable, as well as to locate roots, intersection points, and extrema.
14. Use algebraic methods to solve equations that involve polynomial and radical expressions.
15. Apply algebraic or graphical methods, as appropriate, to solve application problems involving linear, polynomial, and radical functions.
16. Simplify and operate on rational, exponential, logarithmic, and absolute value expressions at the intermediate algebra level.
17. Graph rational, exponential, logarithmic, and absolute value functions at the intermediate algebra level.
18. Solve equations and applied problems involving rational, exponential, logarithmic, and absolute value functions at the intermediate algebra level.

## Topics and Scope:

## I. Effective Learning Skills

A. Study skills

1. Organization and time management
2. Test preparation
3. Test-taking skills
B. Self-assessment: using performance criteria to judge and improve work, analyzing and correcting test errors
C. Use of resources: strategies identifying, utilizing, and evaluating the effectiveness of resources in improving learning (for example, peer study groups, computer resources, lab resources, tutoring resources)
II. Linear Equations and Inequalities in One Variable
A. Linear equations
B. Applications of linear equations
C. Linear inequalities
D. Formulas
III. Linear Equations and Inequalities in Two Variables
A. Cartesian coordinate system
B. Graphing linear equations, including the slope-intercept method
C. Finding the equation of a line
D. Graphing linear inequalities in two variables
E. Systems of equations in two variables
4. Solving by graphing
5. Solving by elimination (addition)
6. Solving by substitution
7. Applications
IV. Integer Exponents and Laws of Exponents
V. Polynomials
A. Definition
B. Operations
C. Factoring
8. Common factors
9. Grouping
10. Trinomials
11. Difference of squares
12. Sum and difference of cubes
D. Solving polynomial equations by factoring
E. Solving quadratic equations
13. Factoring
14. The quadratic formula
15. The square root principle
16. Completing the square
F. Applications
VI. Radicals
A. Square roots
B. Simplification
C. Sums and products of radicals
D. Rationalizing denominators of square roots
E. Higher-index radicals
F. Pythagorean Theorem
G. Radical equations
H. Rational exponents
I. Applications
VII. Use of Technology
A. Evaluate and graph functions
B. Solve equations and inequalities graphically
VIII. Functions
A. Definition of relation, function, domain, and range
B. Function notation and evaluation
C. Interval notation, intersection, and union
D. Analyze graphs of linear, polynomial, and radical functions with and without graphing technology
E. Mathematical models and other applications of linear and nonlinear functions
IX. Equations and Inequalities
A. Equations
17. Solutions of literal equations
18. Algebraic and graphical solutions of linear, quadratic, and radical equations
B. Inequalities
19. Algebraic solutions to linear inequalities
20. Graphical solutions of linear and nonlinear inequalities using graphing technology
X. Quadratic Functions
A. Vertex and general forms
B. Discriminant
C. Solutions to quadratic equations using factoring, quadratic formula, and completing the square
D. Applications and modeling
XI. Systems of Equations and Inequalities
A. Linear and nonlinear systems of equations
B. Systems of linear inequalities
C. Applications and modeling
XII. Rational Functions
A. Domain and range
B. Graphs, including asymptotes and holes
C. Operations
D. Equations
E. Applications
XIII. Absolute Value Functions
A. Domain and range
B. Graphs
C. Properties
D. Equations and inequalities
E. Applications
XIV. Exponential Functions
A. Domain and range
B. Graphs
C. Properties
D. Equations
E. Applications
XV. Logarithmic Functions
A. Domain and range
B. Graphs
C. Properties
D. Expand and condense
E. Equations
F. Applications

## Assignment:

1. Reading outside of class ( $0-60$ pages per week)
2. Problem set(s) (1-8 per week)
3. Quiz(zes) ( $0-4$ per week)
4. Project(s) (0-10)
5. Exam(s) (1-8)
6. Final exam

## Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

## Writing

 0-0\%Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or noncomputational problem solving skills.

## Problem set(s)

Problem solving
5-80\%
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None
Skill Demonstrations 0-0\%

Exams: All forms of formal testing, other than skill performance exams.

Quiz(zes); exam(s); final exam
Other: Includes any assessment tools that do not logically
fit into the above categories.
Project(s)

Other Category 0-10\%

## Representative Textbooks and Materials:

Beginning and Intermediate Algebra. 6th ed. Miller, Julie and O'Neill, Molly and Hyde, Nancy. McGraw-Hill. 2022.
Beginning and Intermediate Algebra. 7th ed. Martin-Gay, Elayn. Pearson. 2023. Instructor prepared materials
