

ANHLT 142 Course Outline as of Fall 2024**CATALOG INFORMATION**

Dept and Nbr: ANHLT 142 Title: VET PHARM MEDICAL CALCS

Full Title: Veterinary Pharmacology and Medical Calculations

Last Reviewed: 5/8/2023

Units	Course Hours per Week		Nbr of Weeks		Course Hours Total	
Maximum	1.50	Lecture Scheduled	1.50	17.5	Lecture Scheduled	26.25
Minimum	1.50	Lab Scheduled	0	8	Lab Scheduled	0
		Contact DHR	0		Contact DHR	0
		Contact Total	1.50		Contact Total	26.25
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 52.50

Total Student Learning Hours: 78.75

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

Catalog Description:

Students will study the use of medication to treat and prevent disease within the veterinary workplace. General pharmacology and medications of all types will be covered. The indications, side effects, and administration of common specific medications will be discussed. Legal requirements for handling, labeling and dispensing medication will be covered in the context of a companion animal practice. This course includes all relevant mathematical skills need for patient specific dosing, filling prescriptions, and related tasks.

Prerequisites/Corequisites:**Recommended Preparation:**

Course Completion of ANHLT 50, ANHLT 120 and MATH 150A

Limits on Enrollment:**Schedule of Classes Information:**

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Identify and explain the effects, risks, and use of common veterinary medications.
2. Perform calculations necessary to determine patient-specific dosing, fill prescriptions and related tasks.

Objectives:

At the conclusion of this course, the student should be able to:

1. Describe basic veterinary pharmacology and discuss risk factors and safety concerns of common veterinary medications.
2. Describe protocols for medication administration.
3. Identify common veterinary medications and mechanism of action of medications, including analgesic, antimicrobial, antiparasitic, ophthalmic and otic medications.
4. Define the legal veterinary/client/patient relationship and discuss the legal requirements for prescription labels.
5. Discuss the current legal requirements for dispensing controlled, compounded, and extra-label use of medications.
6. Evaluate and discuss proper pharmacy record keeping, including inventory and record keeping requirements for controlled substances.
7. Perform drug dosage calculations for oral and parenteral medications.
8. Perform calculations for dilution of medications and fluids for intravenous (IV) use.
9. Perform calculations for fluid therapy, including constant rate infusions.

Topics and Scope:

- I. Veterinary Pharmacology
 - A. Bioavailability and pharmacology
 - B. Routes of administration including oral, aural, ophthalmic, subcutaneous, intramuscular, and intravenous
 - C. Common veterinary analgesic medications
 - D. Common veterinary antimicrobial medications
 - E. Common veterinary antiparasitic medications
 - F. Common veterinary ophthalmic and otic medications
 - G. Common veterinary gastrointestinal medications
 - H. Other common veterinary medications
 - I. Pharmacy inventory, prescription labeling and pharmacy record keeping
 - J. Veterinarian/Client/Patient relationship, compounding, and other legal considerations for veterinary medications
 - K. Relevant client communication
 - L. Controlled substances handling, reporting, and record keeping
- II. Veterinary Calculations
 - A. Fractions, decimals, and percentages
 - B. Ratios and proportion calculations
 - C. Dimensional analysis and unit conversions
 - D. Clinical dosage calculations
 - E. Prescription calculations
 - F. Solution and dilution calculations
 - G. Intravenous fluid calculations
 - H. Constant rate infusion calculations

Assignment:

1. Reading in texts and handouts (20-40 pages/week)
2. Completing self-evaluation exercises in text
3. Completion of mock medical records, case study exercises, and mock medication labeling and dispensing
4. Calculation worksheets
5. Creation and evaluation of hospital protocol sheets and client education materials
6. Quizzes (up to 10) and exams (up to 3)
7. Client handouts
8. Class performances of medical utilization
9. Presentations

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Protocol creation; client handouts

Writing 10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Case studies exercises; calculation worksheets

Problem solving
10 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Mock dispensing and labeling of medications; class performances of medical utilization; presentations

Skill Demonstrations
10 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and exams

Exams
40 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

Self-evaluation exercises; participation

Other Category
0 - 10%
