COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Define basic medical terminology relevant to human anatomy, physiology, diseases, medical procedures and treatments, including medical abbreviations, for all body systems.
2. Identify root words, prefixes, and suffixes commonly used in medical terminology

Objectives:

At the conclusion of this course, the student should be able to:

1. Describe the primary functions of each of the body systems using correct medical terminology.
2. Label or define the major anatomical parts of each body system.
3. Define medical terms related to diseases, procedures, treatments, and abbreviations for each body system.
4. Define word parts that pertain to each of the body systems.
5. Identify the various reports, abbreviations and symbols used in the medical record.
6. Identify common disorders and their associated symptoms for each body system.
7. Identify the medical specialties associated with each body system.

Topics and Scope:

- I. Introduction to Medical Terminology
 - A. Word roots, combining forms
 - B. Spelling, pronunciation
 - C. Prefixes
 - D. Suffixes
- II. Organization of the Body
 - A. Structure of cell, tissues, organs, and systems
 - B. Medical specialties related to body systems
- III. The Medical Record

- A. Medical reports
- B. Abbreviations
- C. Symbols

IV. Body Systems Including Integumentary, Gastrointestinal, Respiratory, Cardiovascular, Blood and Lymph, Musculoskeletal, Urinary, Male Reproductive, Female Reproductive, Endocrine, Eye, Ear and Nervous Systems

- A. Structure and function
- B. Medical terminology
- C. Diseases and their symptoms
- D. Diagnostic, radiographic, clinical, and surgical procedures
- E. Pharmacology and treatment
- F. Abbreviations

Assignment:

1. Textbook reading (10-30 pages per week)
2. Complete workbook lessons and worksheet handouts (10-20 pages per week)
3. Students will create study materials for medical terminology spelling and pronunciation (not graded)
4. Write a medical research paper, accurately using medical information and terminology (3-8 pages)
5. Quizzes (8-16)
6. Midterm and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research paper

Writing
15 - 25%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Workbooks and worksheets

Problem solving
15 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes; midterm and final exam

Exams
50 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
