COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Utilize anthropological methods to estimate an individual's sex, age, trauma, pathology, and cause of death from their skeletal remains.
2. Demonstrate familiarity with the role and responsibilities of forensic anthropologists in the investigative process.

Objectives:

At the conclusion of this course, the student should be able to:

1. Identify the major bones of the body.
2. Estimate sex using the human skeleton.
3. Assess age-at-death of an individual using skeletal and dental markers.
4. Recognize common skeletal pathologies and trauma.
5. Differentiate among pre-, peri-, and post-mortem skeletal injuries.
6. Discuss the relevance of forensic anthropology to crime scene investigations.

Topics and Scope:

- I. Human Osteology
- II. Human Odontology
- III. Sex Determination Techniques
- IV. Age Assessment Techniques
- V. Pathology
- VI. Trauma and Injury

- VII. Cause of Death
- VIII. Minimum and Maximum Number of Individuals
- IX. Logistics of Crime Scene Analysis
- X. Role of Forensic Anthropologist in Medico-legal Contexts
- XI. Review of Well-known Forensic Anthropology Case Studies
- XII. Ethical Considerations in Forensic Anthropology

Assignment:

- 1. Reading assignments (15-50 pages per week)
- 2. Writing assignments (1500-3000 word count) include occasional short-answer and essay responses based on homework reading
- 3. Weekly exercises such as:
 - A. Problem-solving reports
 - B. Skills demonstrations
- 4. Quizzes or exams (2-4), which can include:
 - A. Multiple choice
 - B. True/false
 - C. Matching items
 - D. Short answer
 - E. Essays
 - F. Identification of three-dimensional specimens

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Short answer and essay responses to assigned homework readings and questions	Writing 10 - 15%
--	---------------------

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Reports	Problem solving 10 - 15%
---------	-----------------------------

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Skills demonstrations	Skill Demonstrations 30 - 40%
-----------------------	----------------------------------

Exams: All forms of formal testing, other than skill performance exams.

Quizzes or exams	Exams 30 - 40%
------------------	-------------------

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
