Total Out of Class Hours: 70.00 Total Student Learning Hours: 157.50

Title 5 Category:	AA Degree Applicable
Grading:	Grade Only
Repeatability:	00 - Two Repeats if Grade was D, F, NC, or NP
Also Listed As:	
Formerly:	WINE 55

Catalog Description:
An introduction to vineyard and winery laboratory practices including basic chemistry principles, laboratory techniques, and commonly used analysis methods for musts and wines.

Prerequisites/Corequisites:

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:
Description: An introduction to vineyard and winery laboratory practices including basic chemistry principles, laboratory techniques, and commonly used analysis methods for musts and wines. (Grade Only)
Prerequisites/Corequisites:
Recommended:
Limits on Enrollment:
Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Outcomes and Objectives:
Upon successful completion of this course the student will be able to:
1. Utilize basic laboratory principles and practices common to the wine industry.
2. Effect laboratory tests using appropriate instrumentation.
3. Integrate chemistry theory into wine lab practices.
4. Perform common laboratory tests used in the wine industry.
5. Set up, carry out, and evaluate results of a variety of laboratory trials for analysis of wines.
6. Perform the common microbial assays used in the wine industry.
7. Evaluate and control quality of lab analyses and wine products.

Topics and Scope:

I. Applying Chemistry Theory in a Wine Lab Setting
 A. Chemical analysis
 B. Reviewing procedures
 C. Assembling reagents
 D. Preparing instrumentation
 E. Preparing samples
 F. Performing assays
 G. Collecting and recording data
II. Basic Laboratory Skills
 A. Basic acid/base and biochemistry skills
 B. Use and care of glassware and lab equipment
 C. Scientific notation
 D. Disposing of old samples
 E. Distributing samples to appropriate lab areas
 F. Maintaining sanitation in lab areas
III. Instrumentation
 A. Centrifuges

B. Refractometers
C. Conductivity meters
D. HPLC (High Performance Liquid Chromatography)
E. Nephalometers
F. Thermometers
G. Density meters
H. Hydrometers
I. Aeration oxidation
J. Cash still
K. Spectrophotometer (UV and VIS)
L. Gas chromatography
M. Ebulliometer
N. pH meter
O. DI (deionized water unit) system

IV. Common Laboratory Tests
A. Trials
1. Stability trials
2. Brix
3. TA
4. Total acidity determination pH
5. Ammonia
6. Amino assimilable nitrogen
7. Soluble solids
8. Potassium
9. Volatile acidity
10. Total and free SO2
11. Alcohol determination
12. Malic acids
13. Residual sugar/glucose
14. Dissolved oxygen
15. Color/phenols
16. Cold stabilities
17. Heat stabilities
18. Heavy metals (iron, copper)

B. Spectrophotometer Measurements
C. Paper Chromatography
D. Microbial assays

V. Quality Assurance and Control
A. Quality Assurance
B. Standardizing chemicals
C. Verifying assay acceptability
D. Completing analysis logs
E. Correctly labeling samples
F. Verifying analysis
G. Maintaining handwritten data

Assignment:

Representative assignments.
1. Complete lab analyses.
2. Complete microbial assays.
3. Lab reports.

4. Midterm; final exam.
5. Reading 20 - 30 pages per week.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.	Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Lab reports	Problem solving 40 - 70%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None	Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion, Short answer.	Exams 30 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation.	Other Category 0 - 10%

Representative Textbooks and Materials:
Wine Analysis for Production. Zoecklein, Bruce W. et. al. Kluwer Academic Publisher, 1995.
