**Catalog Description:**  
This course introduces the student to the role of Accounting in processing and reporting the effects of economic vransactions. It examines financial accounting from both the user and preparer perspectives and teaches how information is processed and reported by the accounting information system as well as how the reports are used by investors and creditors in making decisions. The economic transactions are analyzed by type of business activity: operating, investing, or financing and their impact on cash flows and profitability for both service and merchandising concerns.

**Prerequisites/Corequisites:**

**Recommended Preparation:**  
Elig. for English 100A or equiv.

## **COURSE CONTENT**

### **Outcomes and Objectives:**

These objectives comply with the California Core Competency Model developed by the Calif. Society of Certified Public Accountants' Committee on Accounting Education.

The course will prepare the transfer, certificated, and degree student for buisniess or accounting programs. Upon completion of the course the student will be able to:

1. explain how accounting meets the information needs of investors, creditors, managers, regulatory agencies, and taxing authorities.
2. explain the principles, procedures, and concepts underlying the primary financial statements.
3. explain the uses and limitations of financial statements and related information disclosed in the annual report of Securities and Exchange Commission's reports in making decisions.
4. explain what a system is and how an accounting system is designed to meet the needs of specific businesses. Students will be able to input transactions, process this input, and prepare and interpret the financial statements.
5. process the economic transactions for both a service and merchandising concern from the source document through the closing process.
6. explain the differenece in accounting methods allowed under generally accepted accounting principles in the accounting for various assets, liabilities and equity transactions.
7. identify the types of business transactions as being operating, investing or financing activities.

8. explain the difference between accrual based measurements and cash flows from activities.
9. demonstrate analytical, interpersonal, and communication skills in solving problems.
