Catalog Description:

Application of basic principles of cardiac anatomy and physiology to recognize basic heart arrhythmias. Designed for health and allied care personnel who assume responsibility for cardiac monitoring in the pre-hospital and hospital setting.

Prerequisites/Corequisites:

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: Basic principles of cardiac anatomy & physiology to recognize basic heart arrhythmias. Course for health & allied care personnel who assume reponsibility for cardiac monitoring in the pre-hospital or hospital setting. (Grade Only) Prerequisites/Corequisites: Recommended: Limits on Enrollment:

COURSE CONTENT

Outcomes and Objectives:

The students will be able to:

- 1. Label and define nine anatomical structures of the heart and their basic function.
- 2. Define the following terms related to cardiac electrophysiology:
 - A. Depolarization.
 - B. Repolarization.
 - C. Action potential.
 - D. Refractory states.
- 3. Describe the sequence of cardiac activation and recovery, and relate this information to the EKG configuration.
- 4. Demonstrate a systematic method of EKG interpretation.
- 5. Identify normal waveforms for monitoring leads II, MCL 1, MCL 6.
- 6. Classify arrhythmias according to site, mechanism and severity.
- 7. Identify 15 arrhythmias.
- 8. Recognize and describe 4 conduction defects.
- 9. Identify 3 premature and escape beats and state the mechanism for each.
- 10. Given the major arrhythmias , discuss possible nursing and medical interventions for each.

Topics and Scope:

- 1. Overview.
 - A. Cardiac anatomy and physiology.
 - B. Myocardial blood supply.
 - C. Cardiac conduction system.
- 2. EKG Interpretation.
 - A. Vectors, lead placements.
 - B. Waves and measurements.

C. Analysis of EKG rhythm strips.

- 3. Conduction System. A. Anatomy.
 - B. EKG analysis.
 - C. Sinus rhythms.
- 4. Atrial Rhythms.
- 5. Junctional Rhythms.
- 6. Ventricular Rhythms.
- 7. Review of all Cardiac Rhythms.
- 8. Heart Blocks.
- 9. Pacemakers.
 - A. 12 lead EKGs.
 - B. Bundle branch.
- 10. Review.

Assignment:

- 1. Read approximately 10 pages per week.
- 2. On a weekly basis identify approximately 20 rhythm strips.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Quizzes, Exams

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, Performance exams

Exams: All forms of formal testing, other than skill performance exams.

Completion, IDENTIFY EKG RHYTHM STRIPS

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Representative Textbooks and Materials:

Writing 5 - 10%	
Problem solving 5 - 25%	
Skill Demonstrations 30 - 60%	
Exams 15 - 45%	

Other Category
0 - 0%
