COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will be able to:

1. Perform a variety of fundamental clinical medical assisting skills within medical assisting professional and ethical scope of practice.
2. Apply principles which have been learned in the corequisite theory and skills courses.
3. Utilize problem-solving and creative ability involving proper and safe use of equipment, procedures and processes utilized by the clinical medical assistant in a physician's office, a health clinic, and/or outpatient clinic.
4. Plan and implement care in a safe, timely, and organized manner.
5. Correctly prepare medication from an ampule, a vial, and multiple medication prep in one syringe in a clinical setting.
6. Properly administer a variety of injections, e.g., intramuscular, subcutaneous, and intradermal, in a clinical setting.
7. Properly dispose of needles/syringes in a clinical setting according to OSHA guidelines.
8. Demonstrate critical thinking regarding professional concept of confidentiality and ethical and legal implications of working in a clinical medical assisting setting.
9. Utilize problem-solving techniques to address problems encountered in a clinical setting.
10. Communicate effectively, with cultural sensitivity, with patients, physicians, and other medical staff members.

11. Demonstrate professionalism in a clinical setting.
12. Accurately document medical records.

Topics and Scope:

I. Clinical Experience: Medical assisting clinical experience in outpatient clinic facility with fundamental patient-care assignments.

- A. Evaluation criteria
- B. Students will be:
 1. communicating effectively with patients, instructor, and medical staff
 2. practicing fundamental skills within professional and ethical scope of practice for medical assistants
 3. planning and implementing care in a safe, timely and organized manner as it relates to medical asepsis, vital signs, patient examination and history, patient teaching, assisting the physician with office surgery and physical exams, ambulatory aids, hot and cold therapy, aural and ophthalmic procedures
 4. preparing and administering oral and parenteral medications in a safe manner
 5. providing culturally sensitive care
 6. maintaining patient privacy and confidentiality
 7. documenting medical records within legal standards
 8. demonstrating professional behaviors including:
 - a. dependability
 - b. punctuality
 - c. cooperation
 - d. confidentiality
 - f. appropriate appearance
 - g. interest in and willingness to learn
 - h. initiative

II. Clinical Conferences

- A. Orienting students to clinical medical assisting experiences
 1. procedures and evaluations
 2. expectations
 3. assigned experience
- B. Analyzing tasks and problem solving related to clinical medical assisting experiences, pharmacology, administering medications, maintaining aseptic technique, accurately assessing vital signs, assisting the physician in myriad clinical settings, and teaching patients and families
- C. Revising learning objectives, as necessary, during clinical experience to expand skills and prevent errors

Assignment:

1. Receive clinical assignment and implement clinical patient care.
2. Maintain weekly journal to include goals, patient encounters, problems experienced, remedies and solutions implemented, and personal reflections.
3. Participate in problem-solving exercises and role playing of interpersonal conflicts and/or communication skills.

4. Participate in post-clinical conferences, with instructor and peers, with discussion of assigned experiences and any problems encountered.
5. Complete 25 exercises demonstrating the ability to accurately perform clinical medical assisting procedures.
6. Complete 5 to 20 written assignments (1-3 pages) from clinical setting, related to clinical procedures and OSHA standards.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Journals and reports.

Writing
5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Problem solving exercises; clinical experience.

Problem solving
10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams, Clinical experience.

Skill Demonstrations
40 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, Matching items, Completion, Short essay

Exams
15 - 25%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation and attendance.

Other Category
5 - 10%
