Title 5 Category: AA Degree Applicable
Grading: Grade or P/NP
Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP
Also Listed As:
Formerly:

Catalog Description:
Computer investigation, exploration and simulations of concepts in Computer investigation, exploration and simulations of concepts in statistics, descriptive statistics, probability theory including the statistics, descriptive statistics, probability theory including the uniform, binomial, hypergeometric, Poisson, normal, chi-square and uniform, binomial, hypergeometric, Poisson, normal, chi-square and Student's t distributions, central limit theorem, estimation of population Student's t distributions, central limit theorem, estimation of population parameters from a sample, hypothesis testing including parametric and parameters from a sample, hypothesis testing including parametric and nonparametric methods, confidence intervals, correlation and linear nonparametric methods, confidence intervals, correlation and linear regression, introduction to analysis of variance computer simulations regression, introduction to analysis of variance computer simulations and Monte Carlo methods. and Monte Carlo methods.

Prerequisites/Corequisites:
Math 155.

Recommended Preparation:

Limits on Enrollment:

Schedule of Classes Information:

Description: Computer investigation, exploration and simulations of concepts in statistics: descriptive statistics, probability theory, central limit theorem, estimation, hypothesis (parametric & non-parametric), confidence intervals, correlation and linear regression, analysis of variance. (Grade or P/NP)

Prerequisites/Corequisites: Math 155.

Recommended:

Limits on Enrollment:

Transfer Credit: CSU;UC. (CAN STAT2)

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT**Outcomes and Objectives:**

1. Apply graphic displays of data and frequency distributions. Define mean, median, mode, percentiles, variability, standard deviation.
3. Apply laws of probability and Baye's formula.
4. Define combinations, permutations, sample space, probability distributions.
5. Apply Central limit theorem.
6. Calculate sampling distributions of means, proportions, standard error confidence intervals.
7. Apply hypothesis testing for mean, proportion, variance.
8. Apply goodness to fit and independence, required sample size, correlation and linear regression, introduction to analysis of variance.
9. Apply statistics software package for evaluation of data and inference.

Topics and Scope:

1. Statistical Description.
Graphic display of data, frequency distributions, mean, median, mode, percentiles, variability, standard deviation, Chebyshev's Theorem.
2. Counting and Probability Distributions.
Sample space, laws of probability, Bayes' Formula, combinations, permutations, probability distributions (including the uniform, binomial, hypergeometric, Poisson, normal, chi-square, and Student's t), normal approximation to binomial.
3. Statistical Inference.
The sampling distributions of means proportions, standard error, Central Limit Theorem, confidence intervals, hypothesis testing (parametric and extended nonparametric), mean, proportion, variance, large and small samples, goodness of fit and independence, required sample size, correlation and linear regression, introduction to analysis of variance.
4. Uses of Computer and Electronic Calculator.
Use of statistics software package, evaluation of data, Monte Carlo methods of simulations.

Assignment:

1. The student will have daily outside reading, problem set assignments from required text(s), or instructor chosen supplementary materials.
2. Instructional methodology may include, but not limited to: lecture, demonstrations, oral recitation discussion, supervised practice, independent study, outside project or other assignments.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems, Exams

Problem solving
25 - 75%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance exams

Skill Demonstrations
20 - 40%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice

Exams
5 - 25%

Other: Includes any assessment tools that do not logically fit into the above categories.

PROJECT - ORAL OR WRITTEN

Other Category
0 - 15%

Representative Textbooks and Materials:

Text(s) required of each student will be selected by the department, a committee of the department, or the responsible instructor from the books currently available. Choices in the past have included:
STATISTICS, Triola, (7th) 1997 Addison-Wesley
STATISTICS, Bluman (3RD) 1997 WC Brown
