COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Discuss the major psychological research theories in the field of social psychology.
2. With examples, describe and apply various types of research methods used for studying social behavior.
3. Explain how individual personal characteristics (e.g., motivation, feelings, attitudes and cognitive processing) and environment (e.g., norms and cultural rules) interact to influence the individual's goals, beliefs and decisions-making processes.
4. Compare and contrast the four core processes of social cognition (attention, interpretation, judgment and memory).
5. Define self-presentation and analyze how self-presentation is important to appearing likable, appearing competent, and conveying status and power.

6. Distinguish the difference between persuasion and cognitive dissonance, and appraise how these concepts create attitude changes.
7. Differentiate among various types of social influences (e.g., conformity, compliance and obedience).
8. Discuss reasons for obtaining mates and reasons for ending relationships.
9. Compare and contrast the genetic, neural and chemical, and social situational influences of aggression and aggressive behaviors.
10. Provide definitions, causes, and ways of reducing stereotypes, prejudice and discrimination.
11. Evaluate how theories of cooperation/conflict, competition/altruism, and conservation/short-sighted selfishness positively and negatively affect the immediate and global environment in which people live.
