		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable
 Grading: Grade Only
 Repeatability: 33 - 3 Enrollments Total
 Also Listed As:
 Formerly: CET 85

Catalog Description:

Computer-aided design drafting for civil engineering, surveying and land development technicians. Industry standard civil engineering software program will be utilized in this course. Areas covered include input of surveying data for boundary and topography. Creation of a digital terrain model, roadway alignments, earthwork, grading plan, plan view, profile view and cross section drawings as they relate to the civil engineering, surveying and land development profession.

Prerequisites/Corequisites:**Recommended Preparation:**

Course Completion of CEST 51

Limits on Enrollment:**Schedule of Classes Information:**

Description: Computer-aided design drafting for civil engineering, surveying and land development technicians. Industry standard civil engineering software will be used in this course. Areas covered include input of surveying data for boundary & topography. Creation of a

digital terrain model, roadway alignments, earthwork, grading plan, profile and cross sections.
(Grade Only)

Prerequisites/Corequisites:

Recommended: Course Completion of CEST 51

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will:

1. Start and set up a new drawing or open an existing drawing utilizing civil engineering software.
2. Create, edit and manage point data.
3. Import and export point data from field surveys and external files.
4. Create lines and curves for civil engineering projects.
5. Properly label lines and curves with pertinent data on the objects and in tabular form.
6. Perform subdivision computations for area and boundary information.
7. Create a digital terrain model surface of the existing ground from point, contour, fault and break line data.
8. Create a finish grade or design surface.
9. Create contours from digital terrain model surface data.
10. Edit and label contours.
11. Create horizontal and vertical alignments for roadways.
12. Create profiles and cross sections of roadways from alignments or survey data.
13. Draw and define roadway design templates.
14. Compute earthwork volumes using alignments, profiles, cross sections and design templates
15. Create a set of improvement plans, including plan, profile, cross sections and details, using civil engineering software.
16. Repeating students will gain enhanced skills and proficiencies through learning and applying methodologies and tools from updated and upgraded versions of the software.

Topics and Scope:

Lecture and Laboratory

1. An overview of CAD in civil engineering, surveying and land development.
2. Drawing set up.
3. Creating points and point management.
4. Creating lines and curves.
5. Creating line and curve labels and tables.
6. Parcel computations and labeling.
7. Terrain surface modeling and contours.
8. Creating and defining alignments with stationing.
9. Creating profile and cross section views.
10. Volume computations.
11. Creating and defining civil design templates.
12. Creating improvement plans for civil engineering and land development projects.
13. With repeat: Updated versions of software - methodologies and tools.

Assignment:

1. Read approximately one chapter of the textbook per week
2. Weekly lab assignments using CAD technology
3. Quizzes: 4-8
4. Final exam
5. Repeating students will gain enhanced skills and proficiencies through learning and applying methodologies and tools from updated and upgraded versions of the software.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Computational analysis assignments

Problem solving
10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Lab exercises

Skill Demonstrations
40 - 60%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

Exams
25 - 35%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%

Representative Textbooks and Materials:

An Introduction to Autodesk Land Desktop 2007 and Civil Design 2007,
Geoffrey J. Coleman, P.E., SDC Publications, 2007.
