Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: CIS 50.71

Catalog Description:

This course will introduce the student to the basic concepts of the UNIX operating system. Completion of the course will provide a good basic working knowledge of: essential UNIX commands, login and logout sequences, setting passwords, UNIX E-mail, fundamentals of the vi editor; piping and redirection; security and process control, the Kernal, File System, UNIX shell programming, X Windows, and basic system administration.

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100 and Course Completion of CS 80.13

Limits on Enrollment:

Schedule of Classes Information:

Description: This course will introduce the student to the basic concepts of the UNIX operating system. Completion of the course will provide a good basic working knowledge of: essential UNIX commands, login and logout sequences, setting passwords, UNIX E-mail, fundamentals of the vi editor; piping and redirection; security and process control, the Kernal, File System,

UNIX shell programming, X Windows, and basic system administration. (Grade or P/NP)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100 and Course Completion of CS 80.13

Limits on Enrollment: Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

- 1. Organize and manage files and directories.
- 2. Create, modify, and combine documents.
- 3. Produce and run shell scripts and programs.
- 4. Evaluate and customize default system parameters.
- 5. Design, establish, and maintain multiple user accounts and file system.
- 6. Utilize windowing systems.
- 7. Transfer information between systems.
- 8. Analyze and maintain system security.9. Find and evaluate information about UNIX from disparate sources.

Topics and Scope:

- 1. Using Accounts
 - a. Obtaining an account
 - b. Logging in
 - c. User names
 - d. Passwords
 - e. Directories
- 2. UNIX System Basics
 - a. Entering Shell commands
 - b. Creating files and directories
- c. Navigating the file system3. Basic Text Editing with vi
 - a. Command vs. Insert mode

- b. Adding Text
- c. Deleting text
- d. Changing text
- e. Saving a text file
- 4. I/O (Input/Output) Redirection
 - a. Input
 - b. Output
 - c. Piping
- 5. Permissions
 - a. Read, write, execute
 - b. User, Group, Other
 - c. Directory permissions
- 6. System Processes
 - a. Listing
 - b. Controlling
 - c. Terminating
- 7. Getting Information on UNIX
 - a. "man" pages
 - b. "help"
 - c. "info"
 - d. FTP (file transfer protocol)
 - e. Newsgroups
 - f. Web searching
- 8. Symbolic Links
 - a. Hard vs. symbolic links
 - b. Creating links
 - c. Using links
- 9. Tar and Compress
 - a. Tape backups with tar
 - b. File packages with tar
 - c. Compress
 - d. Gzip
 - e. Other compression utilities
- 10. Text File Utilities
 - a. head
 - b. tail
 - c. cut
 - d. paste
 - e. tr
 - f. sort
 - g. grep
 - h. Using pipelines with text utilities
- 11. Introduction to Shell Scripts
 - a. "bash" and other varieties of shell interpreters
 - b. Shell scripts and programming
 - c. Making shell scripts
 - d. Running scripts
 - e. Script permissions
 - f. The PATH variable and scripts
 - g. Special script commands
- 12. The .profile File
 - a. The .profile command and other startup scripts

- b. How .profile works
- c. Commands to include in .profile
- 13. System Administration and Organizational Politics
- 14. Creating User Accounts
 - a. The password file
 - b. Home directories
 - c. Mail directories
 - d. Directory permissions
 - e. Global permissions
- 15. Mounting File Systems
 - a. Varieties of UNIX file systems
 - b. Creating a file system on disk (using a diskette)
 - c. Mounting file systems
 - d. Unmounting
 - e. Checking and repairing file system integrity
- 16. X Windows
 - a. Installing X Windows
 - b. Varieties of X Windows interfaces
 - c. Using X Windows programs
 - d. Common X Windows programs

Assignment:

- 1. Hands-on exercises to demonstrate each topic
- 2. Reading approximately 30 pages weekly from the textbook
- 3. Two to four exams and quizzes
- 4. Participate in class discussion topics

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing 0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Hands-on computer exercises

Problem solving 20 - 60%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0% **Exams:** All forms of formal testing, other than skill performance exams.

Exams: multiple choice, true false, matching items, completion, hands-on examinations

Exams 40 - 80%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation and attendance

Other Category 0 - 10%
