PHYSIO 58 Course Outline as of Fall 2011

CATALOG INFORMATION

Dept and Nbr: PHYSIO 58 Title: INTRO HUMAN PHYSIO

Full Title: Introduction to Human Physiology

Last Reviewed: 1/27/2020

| Units | | Course Hours per Week | , | Nbr of Weeks | Course Hours Total | |
|---------|------|-----------------------|------|--------------|---------------------------|-------|
| Maximum | 3.00 | Lecture Scheduled | 2.00 | 17.5 | Lecture Scheduled | 35.00 |
| Minimum | 3.00 | Lab Scheduled | 3.00 | 6 | Lab Scheduled | 52.50 |
| | | Contact DHR | 0 | | Contact DHR | 0 |
| | | Contact Total | 5.00 | | Contact Total | 87.50 |
| | | Non-contact DHR | 0 | | Non-contact DHR | 0 |

Total Out of Class Hours: 70.00 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

Catalog Description:

This is an introductory course in human physiology, organized around body systems and the theme of homeostasis. The course is designed for the beginning student preparing for these health-related fields: vocational nursing, radiologic technology; or those with a general interest in the function of the human body. This course will minimize bio-chemical and quantitative details taught in a general physiology course (e.g., PHYSIO 1), focusing on the fundamental concepts of physiology. (Not intended for nursing (RN), dental hygiene, or physical therapy majors.)

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 1A or equivalent and Course Completion of CHEM 60

Limits on Enrollment:

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

- 1. Define homeostasis and explain how feedback mechanisms function to maintain homeostasis.
- 2. Describe the function of the organ systems of the body, including the nervous, endocrine, muscular, circulatory, respiratory, digestive, urinary, immune, reproductive systems.
- 3. Identify the roles of the nervous and endocrine systems in regulation of other organ systems.
- 4. Compare and contrast the basic mechanisms by which organ systems of the body maintain homeostasis.
- 5. Explain how the structure and function of cells support the function of organ systems.
- 6. Conduct simple physiological experiments using standard laboratory equipment.

Topics and Scope:

- 1. Introductory concepts
 - a. scientific method
 - b. levels of biological organization

- c. homeostasis
- 2. Cell structure and function
 - a. macromolecules
 - b. organelles
 - c. cell membranes
 - d. ATP (adenosine triphosphate) and enzymes
- 3. Control systems: nervous and endocrine
 - a. neurons, membrane potentials, synapses
 - b. structure and function of CNS (central nervous system), PNS (peripheral nervous system), ANS (autonomic nervous system)
 - c. sensory receptors, transduction
 - d. endocrine glands, hormones
- 4. Muscle system
 - a. skeletal, cardiac, smooth muscle
 - b. muscle contraction
- 5. Circulatory system
 - a. basic plan of circulation
 - b. cardiac cycle
 - c. blood vessels and blood pressure
 - d. regulation of cardiac output, blood pressure
 - e. basis for heart attack, hypertension, atherosclerosis
- 6. Respiratory system
 - a. ventilation
 - b. gas exchange
 - c. regulation of respiratory rate
 - d. description of chronic obstructive pulmonary disease
- 7. Urinary system
 - a. formation of urine
 - b. regulation of salt and water balance
 - c. regulation of acid base balance
- 8. Digestive system
 - a. organs and enzymes of digestion
 - b. factors that affect absorption
- 9. Immune system
 - a. injury and infection
 - b. organs, cells and molecules that provide immune defense
- 10. Reproductive system
 - a. organs and hormones involved in sperm production
 - b. organs and hormones of menstrual cycle, pregnancy, parturition, lactation
- 11. Laboratory exercises
 - a. homeostasis
 - b. osmosis
 - c. enzyme activity
 - d. reflex arc
 - f. senses
 - g. muscle contraction
 - h. cardiac function
 - i. pulmonary function
 - i. renal function
 - k. acid base balance
 - 1. glucose tolerance test

Assignment:

- 1. Read an average of 25-40 pages of text per week
- 2. Perform weekly laboratory experiments with data collection
- 3. Written laboratory reports, 12-16
- 4. Written homework assignments, 0-6
- 5. Examinations: weekly quizzes, 3 combined lecture and lab exams, a cumulative final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Lab reports, homework assignments

Writing 20 - 50%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, true/false, matching items, completion, essay

Exams 30 - 80%

Other: Includes any assessment tools that do not logically fit into the above categories.

Class attendance and participation

Other Category 0 - 20%

Representative Textbooks and Materials:

Essentials of Human Anatomy and Physiology, 10th edition, Elaine Marieb, 2011, Benjamin Cummings

Understanding Human Anatomy and Physiology, 7th edition, SN Longenbaker, 2011, McGraw Hill
