COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Identify key economists and their contribution(s) to modern economic theory within a historical context.

2. Apply economic principles such as opportunity cost, finite resources, and trade-offs to students' everyday lives where spending, working, and saving decisions are concerned.

3. Articulate a vision of the global economy as a means by which individuals worldwide can be

made better-off through the use of markets and the rational allocation of finite resources.

- 4. Incorporate environmental issues into their analyses of global economic relationships.
- 5. Question their own values and popular myths as well as conventional economic hypotheses.

6. Synthesize the ideas of past and current economists and formulate their own perceptions of how best to address the fundamental economic questions of what, how, and for whom.

7. Apply market theory principles to help understand the potential role of government in the economy.

8. Apply discipline-specific research tools to economic data.

Topics and Scope:

- 1. Foundations of Economics
 - a. the economic problem: scarcity
 - b. production possibilities curves
 - c. comparative economic systems
- 2. The Market Economy
 - a. the circular flow of capitalism
 - b. tenets of capitalism

 - g. Monetarists v. Keynesians
 - h. international monetary institutions including the IMF, World Trade Organization World Bank
- 8. Demand Side v. Supply Side Economics
 - a. the model of aggregate demand-aggregate supply
 - b. stagflation: a dilemma for demand side economics
 - c. supply-side external stocks
 - d. tenets of supply-side economics
- 9. Economic Growth and Development (Optional)
 - a. the classical growth model
 - b. the Malthusian Specter
 - c. technological change and productivity
 - d. growth and productivity projections for the U.S. economy
 - e. relationships between international trade development and population growth
- 10. Orientation to the values, themes, methods and history of the discipline both nationally and globally
- 11. Identification of realistic career objectives related to a course of study in the major
- 12. Introduction to discipline-specific research tools, including seminal books, important periodicals, major indexing sources, professional or trade organizations, standard reference tools, discipline-specific tools and major web sites, for both national and global economics

Assignment:

- 1. Read 15-25 pages a week in the text.
- 2. Complete weekly written homework and problems and research.

3. Two to four exams, including a final. Exams will include multiple choice questions, analytical problems that require graphing and computations, and essay questions of approximately 125 words.

4. Optional quizzes.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, research

Writing 5 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems involving computation and graphing.	Problem solving 10 - 40%	
Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.		
None	Skill Demonstrations 0 - 0%	
Exams: All forms of formal testing, other than skill performance exams.		
Quizzes, multiple choice exams, essay exams	Exams 50 - 80%	
Other: Includes any assessment tools that do not logically fit into the above categories.		
None	Other Category 0 - 0%	

Representative Textbooks and Materials: Economics 19th ed. McConnell, Campbell R. and Brue, Stanley L. McGraw-Hill Irwin: 2011.
