COURSE CONTENT

Outcomes and Objectives:

Upon completion of the course, students will be able to:

1. Demonstrate understanding of the transition from paper medical charts to EHR.
2. Demonstrate an understanding of privacy, confidentiality, and security as it relates to EHR.
3. List the major components of an EHR.
4. Discuss the functional components of an EHR framework, such as: architecture, human-computer-interface, data content and vocabulary standards, and security control.
5. Categorize EHR content, purpose, formats and type of data, record standard, and documentation practices.
6. Document the clinical encounter so that it captures charge and patient revenue.
7. Document medical problem by applying: subjective, objective, assessment, plan (SOAP) format, to medication, and allergy data.
8. Integrate functional and content standards into examination/assessment notes, graphics and charts.
9. Outline the workflow patterns, standards, reference information, and alerts and reminders for medication orders and administration.
10. Select appropriate diagnostic and procedural codes in the preparation of billing and practice reports.
11. Create and manage electronic patient files.
12. Compare and contrast the federal, state, and regional electronic record initiatives.

Topics and Scope:

1. Introduction to Electronic Health Records (EHR):
 - A. The medical record
 - B. The EHR
 - C. Functions of a practice management program
 - D. Advantages and disadvantages of the EHR
 - E. Transition from paper to electronic health records
2. Overview of Electronic Health Records:
 - A. Components within an EHR
 - B. Data entry into various fields
 - C. Printing and saving
 - D. Privacy and security
 - E. The EHR framework
 - F. EHR initiatives
 - G. Importance of the EHR
3. Health Care Regulation:
 - A. Documentation of the medical record
 - B. Federal regulations
 - C. Health Insurance Portability and Accountability Act (HIPAA) and EHR
 - D. Security and maintaining privacy
 - E. State and regional initiatives
4. Utilizing the EHR for reimbursement:
 - A. Documentation of telephone messages and patient correspondence
 - B. Documentation of E-visits (email from patients)
 - C. Documentation of patient and family medical histories
 - D. Create a patient letter with clinical information
 - E. Documentation of vital signs and chief complaint
 - F. Scheduling
 - G. Consents, acknowledgements, advance directives, and authorizations
 - i. Consents and notices.
 - ii. Advance Directives.
 - iii. Authorization for release of information.
 - H. Documentation tools:
 - i. Templates and free-text narrative.
 - ii. Graphics and charts.
 - iii. Results reporting.
 - I. Medication orders and administration

Assignment:

1. In-class oral discussions of required chapter readings (1-2 chapters per week).
2. Oral presentation on an Electronic Health Records (EHR) topic.
3. Write one (2-3 page) research paper.
4. Complete assigned written review questions (10-15 per chapter) from textbook.
5. Multiple choice quizzes (4) and final exam.
6. Weekly computer lab exercises.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Research paper,

Writing
20 - 25%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Review questions

Problem solving
10 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Computer exercises.

Skill Demonstrations
10 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and final exam

Exams
20 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

Oral presentation

Other Category
20 - 30%

Representative Textbooks and Materials:

Practice Management & EHR with Connect Plus Access Card: A Total Patient Management, Sanderson, S., McGraw-Hill, 2011
