

**MATH 15 Course Outline as of Fall 2014****CATALOG INFORMATION**

Dept and Nbr: MATH 15 Title: ELEMENTARY STATISTICS

Full Title: Elementary Statistics

Last Reviewed: 10/22/2018

Units	Course Hours per Week		Nbr of Weeks		Course Hours Total	
Maximum	4.00	Lecture Scheduled	4.00	17.5	Lecture Scheduled	70.00
Minimum	4.00	Lab Scheduled	0	6	Lab Scheduled	0
		Contact DHR	0		Contact DHR	0
		Contact Total	4.00		Contact Total	70.00
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 140.00

Total Student Learning Hours: 210.00

Title 5 Category: AA Degree Applicable

Grading: Grade or P/NP

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

**Catalog Description:**

Exploration of concepts in statistics, descriptive statistics, probability theory (including but not limited to the uniform, binomial, Poisson, normal, chi-square and t distributions), Central Limit Theorem, estimation of population parameters from a sample, hypothesis testing (including parametric and nonparametric methods), correlation and linear regression, introduction to analysis of variance, computer simulations.

**Prerequisites/Corequisites:**

Completion of MATH 154 or higher (VF)

**Recommended Preparation:****Limits on Enrollment:****Schedule of Classes Information:**

Description: Exploration of concepts in statistics, descriptive statistics, probability theory, Central Limit Theorem, estimation of population parameters from a sample, hypothesis testing, correlation and linear regression, introduction to analysis of variance, computer simulations.  
(Grade or P/NP)

Prerequisites/Corequisites: Completion of MATH 154 or higher (VF)

Recommended:

Limits on Enrollment:

Transfer Credit: CSU;UC.

Repeatability: Two Repeats if Grade was D, F, NC, or NP

### **CID:**

CID Descriptor: MATH 110 Introduction to Statistics  
SRJC Equivalent Course(s): MATH15 OR PSYCH9

### **Certificate/Major Applicable:**

Major Applicable Course

## **COURSE CONTENT**

### **Outcomes and Objectives:**

Upon successful completion of the course, students will be able to:

1. Create and use graphic displays of data and frequency distributions.
2. Define mean, median, mode, percentiles, variability and standard deviation, and compute each for sets of data.
3. Use laws of probability and Bayes' formula.
4. Define and apply combinations, permutations, sample space, and probability distributions.
5. Apply the Central Limit Theorem.
6. Calculate sampling distributions of means, proportions and standard error.
7. Compute confidence intervals and required sample size.
8. Perform hypothesis testing for mean, proportion and variance.
9. Implement goodness of fit test, the test for independence, and analysis of variance.
10. Discuss linear regression and correlation, and compute regression equations.
11. Use statistics software package for evaluation of data and inference.
12. Process data sets from disciplines including business, social sciences, psychology, life science, health science and education.

## Topics and Scope:

- I. Statistical Description
  - A. Graphic display of data
  - B. Frequency distributions
  - C. Mean
  - D. Median
  - E. Mode
  - F. Percentiles
  - G. Variability
  - H. Standard deviation
  - I. Chebyshev's Theorem
- II. Counting and Probability Distributions
  - A. Laws of probability and counting
  - B. Combinations
  - C. Permutations
  - D. Probability distributions (including, but not limited to, the following)
    1. Uniform
    2. Binomial
    3. Poisson
    4. Normal
    5. Chi-squared
    6. Student t
- III. Statistical Inference
  - A. Sampling distributions
    1. Means
    2. Proportions
    3. Differences of means
  - B. Standard error
  - C. Central Limit Theorem
  - D. Confidence intervals
  - E. Hypothesis testing (parametric and extended nonparametric)
    1. Mean
    2. Proportion
    3. Differences of means
    4. Variances
    5. Goodness of fit and independence
  - F. Required sample size
  - G. Correlation and linear regression
  - H. Introduction to analysis of variance
- IV. Use of computer and electronic calculator
  - A. Evaluation of data
  - B. Methods of simulations
- V. Use data sets from the social, physical and the biological sciences.

## Assignment:

1. Daily reading outside of class (0-50 pages per week)
2. Problem set assignments from required text(s) or supplementary materials chosen by the instructor
3. Exams (2-4) and a final exam; quizzes (0-20)

4. Projects, e.g. computer activities, surveys or data collection and analysis (0-2)

**Methods of Evaluation/Basis of Grade:**

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing  
0 - 0%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Problem sets

Problem solving  
10 - 30%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations  
0 - 0%

**Exams:** All forms of formal testing, other than skill performance exams.

Objective exams, quizzes, final

Exams  
70 - 80%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Projects

Other Category  
0 - 10%

**Representative Textbooks and Materials:**

Elementary Statistics: Picturing the World (5th ed.). Larson, Ron and Farber, Betsy. Pearson: 2011.

Elementary Statistics, A Step by Step Approach (8th ed.). Bluman, Allan. McGraw-Hill: 2010.

Modern Elementary Statistics (12th ed.). Freund, John. Pearson: 2007.

Elementary Statistics (12th ed.). Triola, Mario F. Pearson: 2010.
