Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable
 Grading: Grade Only
 Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP
 Also Listed As:
 Formerly: AG 57B

Catalog Description:

Viticulture practices for spring including vineyard establishment, training, pest control, soils, frost protection, irrigation practices, quality control measures and vineyard equipment use.

Prerequisites/Corequisites:**Recommended Preparation:**

Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:**Schedule of Classes Information:**

Description: Viticulture practices for spring including vineyard establishment, training, pest control, soils, frost protection, irrigation practices, quality control measures and vineyard equipment use. (Grade Only)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Identify and describe vineyard practices appropriate to winter and spring time period.
2. Identify and demonstrate various pruning strategies appropriate to different trellising systems.
3. Identify and demonstrate various vine training strategies appropriate to different trellising systems.
4. Develop a farm plan and budget appropriate to winter and spring time period.
5. Evaluate spring practices performed and give recommendations for improvement.

Objectives:

Upon completion of course, students will be able to:

1. Identify internal and external grapevine structures and their functions.
2. Determine the appropriate method of pruning for a given grape variety.
3. Evaluate various methods of pruning as they relate to quality grape production.
4. Select and properly handle vine products for vineyard planting.
5. Evaluate approaches to weed control and pest and recommend appropriate methods.
6. Identify disease symptoms common in the spring vineyard.
7. Identify vineyard pests and recommend appropriate control methods.
8. Compare and contrast the different methods of frost control.
9. Outline steps for laying out and planting a vineyard
10. Compare and contrast various planting techniques.
11. Develop an effective fertilization plan for the spring vineyard.
12. Determine appropriate irrigation methods for and water needs of grapevines.
13. Manage a grapevine canopy for maximum fruit production and flavor.
14. Identify and describe uses for various pieces of vineyard equipment.
15. Schedule appropriate vineyard farming and management practices throughout the vineyard growth cycle.

Topics and Scope:

I. Grapevine Anatomy and Physiology

- A. Internal and external structures
- B. Photosynthesis and its relationship to cultural techniques
- C. Spring growth cycle

II. Propagation and Nursery Operations

- A. Vine products
 - 1. Grapevine products
 - a. Scion cuttings
 - b. Rootstock cuttings
 - 2. Dormant rootings
 - a. Scion rootings
 - b. Rootstock rootings
 - 3. Dormant bench-grafted vines
 - 4. Grafted potted green-vines
- B. Budwood collection
 - 1. Sanitation
 - 2. Cold storage

III. Weed Control

- A. Pesticide safety and protective equipment
- B. Weed Control
 - 1. Weed identification
 - 2. Control techniques
 - a. Chemical
 - b. Organic and sustainable weed control
 - 3. Age of vine

IV. Disease Control

- A. Diseases of grapevines
 - 1. Winter
 - 2. Spring
 - 3. Summer
 - 4. Fall
- B. Control methods
 - 1. Conventional
 - 2. Sustainable
 - 3. IPM (integrated pest management)
 - 4. Organic

V. Insect Pest Control

- A. Identification
- B. Control methods
- C. Rodents
- D. Birds

VI. Frost Control

- A. Mechanical methods
 - 1. Wind machines
 - 2. Heaters
 - 3. Sprinklers and micro-pulsators
- B. Cultural methods

VII. Vineyard Layout and Planting

- A. Layout

B. Planting

1. Sorting
2. Trimming stock

C. Planting methods

1. Hand
2. Auger
3. High pressure water
4. Mechanical planters

VIII. Vineyard Soils and Fertilizer

A. Soils

1. Types, texture and structure
2. Soil profile and horizons

B. Fertilization

1. Visual evaluation
2. Chemical soil test
3. Tissue analysis
4. Amendments
5. Fertilizer needs

C. Fertilizer application techniques and equipment

1. Foliar
2. Fertigation
3. Broadcast

IX. Irrigation Theory and Practice

A. Water needs of grapevines

B. Irrigation system selection and installation

C. Drip irrigation vs. other systems

D. Moisture measuring devices

X. Canopy Management

A. Canopy evaluation

B. Crop control

1. Shoot thinning
2. Cluster thinning

C. Cordon suckering and weak shoot removal

D. Shoot positioning

XI. Vineyard Equipment

A. Tractors

1. Wheel
2. Tract

B. Implements

1. Discs
2. Tillage equipment
3. Mowing equipment
4. In-row equipment

C. Sprayers

XII. Crop Projections

XIII. Farming and Managing an Established Vineyard

A. Overview of vineyard practices during the growth cycle

B. Vineyard floor management

C. Vineyard facilities maintenance

D. Equipment repair and maintenance

E. Harvest Preparation

XIV. Sustainable Agricultural Practices

XV. Organic Agricultural Practices

Assignment:

Representative assignments:

1. Reading, 15 - 20 pages per week.
2. Lab activities such as:
 - a. Pruning and training
 - b. Sorting and planting techniques
 - c. Vineyard layout - mapping a vineyard
 - d. Irrigation
3. Lab reports, 2-3 pages per activity.
4. Four quizzes; midterm; final exam.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Lab reports

Problem solving
20 - 30%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Pruning and training.

Skill Demonstrations
10 - 20%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, Midterm, Final Exam: Multiple choice, True/false, Matching items, Completion, Short answer.

Exams
60 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%

Representative Textbooks and Materials:

Instructor provided materials.

The Grapevine-From the Science to the Practice of Growing Vines for Wine, P. Iland, et al,

Patrick Iland Wine Productions, Pty., 2011.
