## **COURSE CONTENT**

### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Develop a planting calendar for crop production.
2. Select appropriate seeds for intended crops.
3. Summarize the basics of successful herb cultivation.

### **Objectives:**

Upon completion of this course, the student will be able to:

1. Develop a planting calendar for crop production.
2. Analyze a representative soil sample and assess texture, structure and components.
3. Recommend appropriate fertilization to create optimal garden soil conditions.
4. Properly prepare soil for planting.
5. Select appropriate seeds for intended crops.
6. Propagate plants by sexual and asexual means.
7. Discuss local marketing strategies for crops.
8. Apply appropriate weed and disease treatments.
9. Summarize the basic principles of irrigation and water management.
10. Apply appropriate amendments to ensure proper supply of nutrients to plants.
11. Summarize the basics of successful herb cultivation.
12. Discuss varieties of flowers well suited for cut-flower production.

### **Topics and Scope:**

- I. Introduction to Organic Gardening and Sustainable Food Production
- II. Gardening Basics
  - A. Defining Organic
  - B. Climate
  - C. Planting Calendar
  - D. Planning
- III. Soil

- A. Soil analysis
  - 1. Soil texture
  - 2. Soil structure
  - 3. Soil organic matter
  - 4. Using a soil survey map
- B. Soil fertility
  - 1. Essential plant nutrients
  - 2. Soil pH
  - 3. Fertilization of garden soils
- IV. Preparing the Soil
  - A. Cultivation
  - B. Tillage
- V. Seeds
  - A. Obtaining
  - B. Selecting
  - C. Storing
  - D. Sowing seeds for cool season crops
- VI. Plant Propagation
  - A. Sexual
  - B. Asexual
- VII. Marketing
  - A. Local marketing strategies
    - 1. Contract marketing
    - 2. Farm Trails
    - 3. Industry partnerships
  - B. Advertising
  - C. Other
- VIII. Water Management
  - A. Watering
  - B. Water Quality
  - C. Irrigation
- IX. Crops
  - A. Cool season vegetables
  - B. Warm season vegetables
  - B. Fruits and berries
  - C. Cover crops
  - D. Nutrient management
    - 1. Amendments
    - 2. Composting
    - 3. Green manures
- X. Pest Management
  - A. Insects
  - B. Vertebrate pests
  - C. Weeds
  - D. Diseases
- XI. Herb and Cut Flower Production
- XII. Organic Certification

**Assignment:**

Assignments may include:

1. Reading, 20 - 30 pages per week.

2. Notebook: maintain a notebook of lecture notes, weekly handouts, and notes on garden activities, field trips and speakers. Will be graded as mid-term progress report.
3. Written report (4 pages) on an actual or fictitious farm operation.
4. Oral presentation on written report.
5. Final exam.

### Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Notebook notes; report.

Writing  
20 - 30%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving  
0 - 0%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, Field work

Skill Demonstrations  
20 - 30%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion, SHORT ANSWER

Exams  
20 - 30%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation.

Other Category  
15 - 25%
