

GIS 51 Course Outline as of Fall 2015**CATALOG INFORMATION**

Dept and Nbr: GIS 51 Title: INTERMEDIATE GIS
 Full Title: Intermediate Geographic Information Systems (GIS)
 Last Reviewed: 9/26/2016

Units	Course Hours per Week		Nbr of Weeks		Course Hours Total	
Maximum	3.00	Lecture Scheduled	2.00	17.5	Lecture Scheduled	35.00
Minimum	3.00	Lab Scheduled	3.00	8	Lab Scheduled	52.50
		Contact DHR	0		Contact DHR	0
		Contact Total	5.00		Contact Total	87.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 70.00

Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Catalog Description:

This is an intermediate level course in the concepts of geographic information systems (GIS). Topics include elements of GIS, data structures and their management, intermediate input and output functions and mapping possibilities. Hands-on exposure to GIS technology through the use of computers and current industry standard software is provided during the laboratory.

Prerequisites/Corequisites:

Course Completion of GIS 40 OR APTECH 54A

Recommended Preparation:**Limits on Enrollment:****Schedule of Classes Information:**

Both Certificate and Major Applicable

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, the student will be able to:

1. Demonstrate and understanding of the structure and organization of the software package
2. Create a project using GIS software
3. Define and apply the relationship of geographic features and attribute data
4. Perform feature identification and classification
5. Perform query and analysis functions
6. Define and edit spatial relationships
7. Create a map layout
8. Integrate GIS with other software and technology
9. Utilize basic cartographic principles in map design and construction.

Topics and Scope:

Lectures will cover the following topics:

1. Identify source files
 - a. Links to files
 - b. How to change files in the project
2. Perform geocoding for geographic location
3. Perform selection by location for data analysis
4. Perform spatial joins of database information
5. Overlay analysis by:
 - a. Proximity
 - b. Spatial data processing
 - c. Clip data demonstration
 - d. Dissolve data demonstration
 - e. Append to data demonstration

- f. Demonstrate the Union function
- 6. Utilize GIS software features
 - a. Create metadata
 - b. Utilize Toolbox features
- 7. Produce map layouts
 - a. Create reports
 - b. Create graphs
- 8. Create and edit geodatabases
- 9. Create and edit data sources
 - a. Import and edit other data formats
 - b. CAD
 - c. Interchange files
 - d. Text and CSV files
 - e. MS Access files
- 10. Perform intermediate level analysis functions on data
 - a. Queries
 - b. Attribute joins
 - c. Spatial joins
 - d. Edit attributes
 - e. Create edit centroids
- 11. Perform intermediate level statistical analysis
- 12. Create summary tables: perform spatial adjustment & georeferencing
- 13. GIS design
 - a. Need for GIS design
 - b. The software engineering approach
 - c. Structured design model
 - d. Formal GIS design methodology
 - e. Verification and validation
- 14. GIS output
 - a. The display of analysis
 - b. Cartographic output
 - c. Map design controls
 - d. Nontraditional cartographic output
 - e. Non-cartographic output
 - f. Technology and GIS output

Assignment:

- 1. Read approximately one chapter of the textbook per week
- 2. Weekly lab assignments using GIS technology
- 3. Create GIS map
- 4. Midterms: 2
- 5. Final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Weekly lab assignments

Problem solving
20 - 40%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Create GIS map

Skill Demonstrations
10 - 20%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, completion, true-false, short answer

Exams
50 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
