COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply cognitive paramedic knowledge to the care of an ill or injured person in the controlled environment of a hospital or clinical setting.
2. Demonstrate the ability to perform psychomotor skills as outlined in the California state regulations, Health and Safety Code, Title 22 and National Registry of Emergency Medical Technicians.
3. Demonstrate personal behaviors consistent with professional and employer expectations while caring for an ill or injured person.

Objectives:

At the conclusion of this course, the student should be able to:

1. Demonstrate verbal and written communication skills with patients, families, and members of health care team
2. Demonstrate ability to perform a thorough patient assessment on an adult or pediatric patient with a medical complaint or traumatic injury
3. Integrate clinical findings to determine a treatment plan for the adult or pediatric patient with a medical complaint or traumatic injury
4. Demonstrate affective behaviors expected of a professional paramedic
5. Recognize normal and abnormal cardiac rhythms
6. Administer appropriate medication to treat abnormal cardiac rhythms
7. Demonstrate assessment and management of a patient with a cardiovascular emergency
8. Demonstrate assessment and management of a patient with a respiratory emergency
9. Demonstrate assessment and management of a patient with a medical emergency of the endocrine, nervous, gastrointestinal, genitourinary (GI/GU) and reproductive systems
10. Demonstrate assessment and management of a patient under the influence of alcohol or other chemical substance

11. Demonstrate proper technique of handling infectious disease issues
12. Demonstrate management of a patient exhibiting a behavioral emergency
13. Assist in a normal labor and delivery
14. Discuss complications of an obstetrical patient
15. Demonstrate assessment and management of a neonate

Topics and Scope:

- I. Paramedic Theory
 - A. Leadership
 - B. Verbal and written communication
- II. Assessment and Management
 - A. Patient assessment
 - B. Airway management and oxygen therapy
 - C. Intravenous cannulation
 - D. Medication administration
- III. Medical Emergencies
 - A. Cardiology
 - B. Respiratory
 - C. Endocrine
 - D. Neurology
 - E. GI/GU
 - F. Reproductive
 1. Normal Labor and Delivery
 2. Complications of Delivery
 - G. Behavioral
 - H. Infectious disease

Assignment:

1. Case studies (10 - 15)
2. Research 15-30 home medications
3. Interpretation of 10 electrocardiograms (ECG)
4. Affective and performance evaluations
5. Record patient assessments and skills (documentation)
6. Attendance as mandated by Title 22

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Patient case studies

Writing 20 - 30%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving 0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Performance Evaluations

Skill Demonstrations
20 - 30%

Exams: All forms of formal testing, other than skill performance exams.

None

Exams
0 - 0%

Other: Includes any assessment tools that do not logically fit into the above categories.

Affective behaviors, attendance, data tracking (documentation)

Other Category
40 - 60%
