Both Certificate and Major Applicable

## **COURSE CONTENT**

### **Outcomes and Objectives:**

Upon successful completion of this course the student will be able to:

1. Name and explain how the major markets of the environmental horticulture industry function within Sonoma County and California
2. List ways that the field of Environmental Horticulture contributes to a more sustainable environment
3. Demonstrate safe use of common tools and equipment used for plant propagation and landscaping
4. List and describe the major structures of plants and their functions
5. Formulate soils and container media following a given recipe
6. Propagate plants utilizing both sexual and asexual methods
7. Explain the requirements needed for healthy plant growth, including watering, fertilization, and pest control
8. Explain fertilizer analysis, ratios, and applications following label directions
9. Compare the various types of horticultural structures used for growing crops
10. Describe and compare various horticulture occupations, their employment requirements, and their basic business structure and operations
11. Demonstrate how to plant and care for given horticultural crops
12. Demonstrate an understanding of basic plant identification and nomenclature
13. Perform common turf and landscape maintenance practices

**Topics and Scope:**

# I. The Environmental Horticulture Industry in Sonoma County and California

- A. History
- B. Current scope
- C. Future growth/employment

# II. Awareness of Environmental Issues and Sustainable Solutions

- A. Waste
- B. Water
- C. Fertilizers
- D. Pesticides

# III. Horticultural Occupations and Their Employment Requirements

- A. Nursery
- B. Landscape
- C. Turf
- D. Floral design
- E. Education
- F. Public service

# IV. Tools, Equipment, and Safety Practices

- A. Use of tools, specialized equipment, and nomenclature
- B. Safety in handling equipment
- C. Safety in handling pesticides

# V. Plant Structures and Functions

- A. Stems
- B. Leaves
- C. Flowers
- D. Fruit/Seeds
- E. Roots

# VI. Soils and Container Media

- A. Types of soils
- B. Soil reactions
- C. Amending soils

# VII. Plant Propagation

- A. Seeds
- B. Cuttings

# VIII. Requirements of Plant Growth

- A. Light
- B. Air
- C. Water
- D. Mineral
- E. Anchorage

# IX. Irrigation and Fertilizing

- A. Plant needs
- B. Deficiency symptoms
- C. Methods of application/techniques
- D. Application Rates
- E. Fertilizer schedules

# X. Pest and Disease Overview

- A. Pests/disease identification
- B. Damage assessment
- C. Control measures

# XI. Horticultural Structures

- A. General layout
- B. Greenhouses

- C. Propagation units
- D. Systems - heating/cooling, irrigation/mist
- XII. Environmental Horticulture Business Types
  - A. Retail nursery and garden centers
  - B. Wholesale production nursery
  - C. Landscape contractor
  - D. Landscape designer/Landscape architect
  - E. Landscape maintenance/gardening company
  - F. Flower shop
  - G. Interiorscape company
  - H. Arboriculture company
- XIII. Nursery and Greenhouse Crops - Planting and Care
  - A. Planting - propagation by sexual and asexual means
  - B. Transplanting larger sizes
  - C. Pruning and maintenance of container stock
- XIV. Plant Identification and Nomenclature
  - A. Basic plant identification, terminology, and techniques
  - B. Grouping of plants according to horticultural characteristics, e.g., size, rate of growth, ideal environmental
  - C. Shrubs, trees, ground covers, vines, annuals-perennials, house plants
- XV. Common Turf and Landscape Practices
  - A. Lawn planting
  - B. General care
- XVI. Basic Floral Design
  - A. Introduction to floristry
  - B. Various types of floral arrangements

All topics covered in lecture will also be covered in lab.

### **Assignment:**

#### **Lecture-Related Assignments:**

1. Research paper on a topic related to a specific horticultural career path (3 - 5 pages)
2. Reading and homework in assigned text (20-30 pages/week)
3. In-class exercises requiring demonstration of plant identification and nomenclature, plant propagation, and safe and appropriate use of landscape tools and equipment
4. Quizzes, mid-term, and final exam

#### **Lab-Related Assignments:**

1. Exercises and worksheets related to plant structures and functions, requirements of plant growth, irrigation and fertilization, pests and diseases, horticultural structures, and horticultural business types

### **Methods of Evaluation/Basis of Grade:**

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Homework, research paper
--------------------------

Writing 10 - 20%
---------------------

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Exercises and worksheets: plant structures and functions, requirements of plant growth, irrigation and fertilization, pests and diseases, horticultural structures, and horticultural business types

Problem solving  
10 - 20%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

In-class exercises requiring demonstration of: plant identification and nomenclature, plant propagation, and safe and appropriate use of landscape tools and equipment

Skill Demonstrations  
10 - 30%

**Exams:** All forms of formal testing, other than skill performance exams.

Midterm, quizzes and final include multiple choice, true/false, matching items

Exams  
30 - 50%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

None

Other Category  
0 - 0%

### **Representative Textbooks and Materials:**

Principles of Horticulture. 6th ed. Adams, Charles and Early, Mike. Routledge. 2011 (classic)  
Hartmann's Plant Science: Growth, Development, and Utilization of Cultivated Plants. 5th ed. McMahon, Margaret and Kofranek, Anton. Pearson. 2010 (classic)  
Practical Horticulture. 7th ed. Rice, Laura and Rice, Robert Jr. Pearson. 2010 (classic)
