COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Describe and demonstrate electrical principles and regulations related to electricians' trade.
2. Apply best practices in practical environment related to electricians' trade.

Objectives:

Upon completion of this course, the students will be able to:

1. Describe the components of optoelectronic devices and explain their function.
2. Demonstrate the ability to operate programmable controllers.
3. Describe the components for swimming pools and fountains and electrical safety code requirements.

Topics and Scope:

- I. AC motor Variable Speed Control
- II. Conduit Bending
- III. Electric heating
 - A. Panel installation
 - B. Conduit installation
- IV. Digital Logic
 - A. Switching circuits
 - B. Controls
 - C. Panels and conduit
- V. Fiber Optics
 - A. Optoelectronic devices
 - B. Electronic applications
- VI. Process Control
 - A. Principals
 - B. Time lags
- VII. Knots and Riggings
- VIII. Swimming Pools and Foundations
- IX. Safety Review

All topics are covered in the lecture and lab portions of the course.

Assignment:

Lecture-Related Assignments:

1. Homework assignments (1 to 2 sets per week)
2. Quizzes and examinations (4 to 6 per semester)

Lab-Related Assignments:

1. Class performances and field work (on-the-job demonstrations) of skill development, safety practices, equipment, and material handling

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework assignments; quizzes; field work

Problem solving
10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances; field work

Skill Demonstrations
50 - 65%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and examinations to include multiple choice, true/false, matching items, and completion

Exams
10 - 20%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category
5 - 10%

Representative Textbooks and Materials:

Lighting Design Basics. 3rd ed. Karlen, Mark and Spangler, Christina and Benya, James. John Wiley and Sons. 2017

Programmable Logic Controllers. Lin, Jonathon. Industrial Press, Inc. Pearson Custom Publishing. 2016

Fundamentals of Motor Control. Pearson Learning Solutions. 2010 (classic)

Building Automation: Control Devices and Applications. NJATC. American Technical

Publishers. 2008 (classic)

Motors. NJATC. American Technical Publishers. 2008 (classic)

Hazardous Locations. NJATC. National Joint Apprenticeship Training Committee. 2006 (classic)
