DET 189 Course Outline as of Fall 2018

CATALOG INFORMATION

Dept and Nbr: DET 189 Title: HEAVY DUTY ELECTRICAL

Full Title: Heavy Duty Equipment Electrical Systems

Last Reviewed: 1/22/2018

Units		Course Hours per Week		Nbr of Weeks	Course Hours Total	
Maximum	3.00	Lecture Scheduled	2.25	17.5	Lecture Scheduled	39.38
Minimum	3.00	Lab Scheduled	2.25	8	Lab Scheduled	39.38
		Contact DHR	0		Contact DHR	0
		Contact Total	4.50		Contact Total	78.75
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 78.75 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly: DET 89

Catalog Description:

Principles of operation of electrical and electronic components and systems used in medium/heavy duty trucks, public transportation, construction and agricultural equipment. Introduction to electronic control systems.

Prerequisites/Corequisites:

Recommended Preparation:

Eligibility for ENGL 100 or ESL 100 and Course Completion of DET 179

Limits on Enrollment:

Schedule of Classes Information:

Description: Principles of operation of electrical and electronic components and systems used in medium/heavy duty trucks, public transportation, construction and agricultural equipment. Introduction to electronic control systems. (Grade Only)

Prerequisites/Corequisites:

Recommended: Eligibility for ENGL 100 or ESL 100 and Course Completion of DET 179

Limits on Enrollment:

Transfer Credit:

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Certificate/Major Applicable:

Both Certificate and Major Applicable

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Diagnose and repair starting, charging and chassis electrical systems.
- 2. Use computer based daignostic scan tools with on on-board diagnostic systems.
- 3. Inteprete service manuals and schematics for electrical systems.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Explain the fundamentals of alternating current (AC), direct current (DC), series and parallel circuits.
- 2. Read and interpret schematic diagrams.
- 3. Evaluate electrical circuits from schematic diagrams.
- 4. Properly use diagnostic tools related to the analysis and repair of electrical systems.
- 5. Identify, locate, and analyze electronic components and microprocessors.
- 6. Test, diagnose, and repair electrical and electronic circuits and components.
- 7. Discuss and apply personal, shop, and environmental safety procedures.

Topics and Scope:

- I. Review
 - A. Laws and theory
 - B. Diagnostic tools
 - C. Direct current
 - D. Alternating current
- II. Symbols and Diagrams
 - A. Electrical symbols
 - B. Use of schematic diagrams
- III. Series and Parallel Circuits
 - A. Series circuits
 - B. Parallel circuits

- C. Series-parallel circuit
- IV. Testing and Repair of Components
 - A. Battery testing
 - B. Starters
 - C. Alternators/generators
 - D. Lighting circuits
 - E. Switches and relays
 - F. Harnesses and ECM's
- V. Electronic Components and Microprocessors
 - A. Sensors/switches
 - B. Electronic control modules
 - C. Actuators
 - D. Diagnosis with scanner
- VI. On-Board Networks and Diagnostics
- VII. Testing, Diagnosis, and Repair
 - A. Using test equipment
 - B. Diagnostic procedures and manuals
 - C. Repair of electronic circuitry
- VIII. Safety
 - A. Personal
 - B. Shop
 - C. Environmental

All topics are covered in both the lecture and lab parts of the course.

Assignment:

Lecture-Related Assignments:

- 1. Reading 25 50 pages a week
- 2. Ten to fifteen tests to include final exams

Lab-Related Assignments:

- 1. Evaluate batteries and starting systems, complete task sheets
- 2. Test and analyze charging systems, complete task sheets
- 3. Inspect and test starters and alternators
- 4. Test electronic control systems with computer diagnostic tools
- 5. Complete NATEF (National Automotive Technicians Education Foundation) recommended task sheets
- 6. Daily work logs (work assigned, work completed)

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Daily work logs	Writing 0 - 25%
	1

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Task sheets

Problem solving 10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Starter and alternator inspections, test electronic controls

Skill Demonstrations 10 - 25%

Exams: All forms of formal testing, other than skill performance exams.

Tests to include final

Exams 40 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category 0 - 0%
