COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

- 1. Present a design concept for a client project, including a bid.
- 2. Implement the design concept, utilizing project management skills.
- 3. Develop a post occupancy evaluation (POE) for a completed project.

Objectives:

At the conclusion of this course, the student should be able to:

- 1. Collect relevant data to formulate program requirements as an initial step in the design process.
- 2. Create design concepts that are consistent with program requirements.
- 3. Analyze program requirements using applicable codes and standards.
- 4. Analyze and allocate space according to client needs and program requirements.
- 5. Develop design documents that reflect professional standards and techniques.
- 6. Create visual presentation materials that reflect professional standards and techniques.
- 7. Deliver a design presentation with reason and clarity.
- 8. Develop design solutions with appropriate speed and proficiency to meet established deadlines.
- 9. Produce accurate bids for a design job.

Topics and Scope:

- I. Introduction to Design Projects
 - A. The design process
 - B. The design team
 - C. Ethics and client relations
- II. Programming/Pre-Design
 - A. Collecting relevant data

- B. Formulating program requirements
- C. Preliminary budget
- D. Creating design concepts consistent with program requirements
- III. Codes and Standards
 - A. Building codes
 - B. Accessibility codes
 - C. Energy codes
 - D. Analyzing program requirements using applicable codes and standards
- IV. Developing Design Documents
 - A. Floor plans
 - B. Elevations and sections
 - C. Reflected ceiling and lighting plans
 - D. Mechanical, electrical, and plumbing plans
 - E. Detail drawings
 - F. Schedules and legends
 - G. Furnishing specifications and background finish
 - H. General specifications and requirements
- V. Client Presentations
 - A. Visual presentation materials
 - B. Effective oral presentation of design
 - C. Acquiring design approval
 - D. Design revision processing
- VI. The Bidding Process
 - A. Researching contractors and other tradespeople
 - B. Preparing bid documents
 - C. Acquiring bids
 - D. Reviewing bids with client
 - E. Bid award
- VII. Project Management
 - A. Issue purchase orders
 - B. Receipt of goods, materials, and supplies
 - C. Payment order requests
 - D. Overseeing contractors and subcontractors
 - E. Addendums and change orders
 - F. Evaluating quality of work and products
 - G. Post occupancy evaluation (POE)

All topics are covered in the lecture and lab portions of the course.

Assignment:

Lecture-Related Assignments:

- 1. Assigned reading (15-30 pages per week)
- 2. Oral presentations (2-3)
- 3. Final exam or final project presentation

Lab-Related Assignments:

- 1. Design projects (2-3)
- 2. Bid packages (2-3)

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments and skill demonstrations are more appropriate for this course.

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Design projects and bid packages

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Presentations

Exams: All forms of formal testing, other than skill performance exams.

Exam or final project presentation

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Representative Textbooks and Materials:

Interior Design Illustrated. 4th ed. Ching, Francis. Wiley. 2018

Construction Drawings and Details for Interiors. 3rd ed. Kilmer, Rosemary, Kilmer, Otie. Wiley. 2016

Instructor prepared materials
