Catalog Description:
This course combines anatomy and kinesiology by addressing the anatomical structure and function of the musculoskeletal system as it relates to human movement and exercise. Muscular analysis and practical application, including strengthening and flexibility exercises for each muscle, will be emphasized. Students will also study physiological and biomechanical principles.

Prerequisites/Corequisites:

Recommended Preparation:
Eligibility for ENGL 100 or ESL 100

Limits on Enrollment:

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Use correct anatomical terminology when describing a particular movement or exercise.
2. Identify and analyze exercises or movements related to muscle groups using the principles of biomechanics and neuromuscular properties.

Objectives:

1. Demonstrate knowledge of correct anatomical terminology used to describe body part locations, position, and direction.
2. Describe the various types of bones, muscles, and joints in the human body and their location, movements, and characteristics.
3. Explain basic neuromuscular concepts and muscle properties in relation to how muscles function in joint movement and work together in affecting motion.
4. Demonstrate knowledge of the principles of biomechanics.
5. Locate the major muscles of the human body, including origin, insertion, and action.
6. Identify the location, movements, and muscles associated with all the joints in the body.
7. Analyze exercises of the upper extremity, trunk, and lower extremity to determine the joint movements, types of contractions, and specific muscles involved in those movements.

Topics and Scope:

- I. Foundations of Structural Kinesiology
 - A. Anatomical directional terminology
 - B. Planes of motion
 - C. Skeletal System
 1. Axial Skeleton

2. Appendicular Skeleton
3. Classification of Bones
4. Bone features, properties, and markings
5. Bone development and growth
- D. Joints
 1. Structural classification
 2. Functional classification
 3. Terms describing joint movements
- II. Neuromuscular Fundamentals
 - A. Muscle nomenclature
 - B. Muscle shape and fiber arrangement
 - C. Muscle tissue properties
 - D. Muscle terminology
 - E. Types of muscle action
 - F. Role of muscles
 - G. Neural control of voluntary movement
 - H. Proprioception and kinesthesia
 - I. Neuromuscular concepts
- III. Biomechanics
 - A. Levers, pulleys, wheels and axles
 - B. Laws of motion and physical activities
 - C. Friction
 - D. Balance, equilibrium, and stability
 - E. Force and mechanical loading
- IV. The Shoulder Girdle and Shoulder Joint
 - A. Bones, nerves, joints and movement of the shoulder girdle and shoulder joint
 - B. Muscles of the shoulder girdle and shoulder joint
 1. Location and action
 2. Origin and Insertion
 3. Palpation and Innervation
 4. Application, strengthening, and flexibility
- V. The Elbow and Radioulnar Joints
 - A. Bones, nerves, joints and movement of the elbow and radioulnar joints
 - B. Muscles of the elbow and radioulnar joints
 1. Location and action
 2. Origin and insertion
 3. Palpation and innervation
 4. Application, strengthening, and flexibility
- VI. The Wrist and Hand Joints
 - A. Bones, nerves, joints and movement of the wrist and hand joints
 - B. Muscles of the wrist and hand joints
 1. Location and action
 2. Origin and insertion
 3. Palpation and innervation
 4. Application, strengthening, and flexibility
- VII. Muscular Analysis of Upper Extremity Exercises
 - A. Upper extremity activities
 - B. Analysis of movement
 - C. Open and closed kinetic chain
 - D. Overload, SAID (Specific Adaptations to Imposed Demands) principle, specificity, and muscular development
 - E. Valsalva maneuver

- F. Analysis of upper body exercises
- VIII. The Hip Joint and Pelvic Girdle
 - A. Bones, nerves, joints and movement of the hip joint and pelvic girdle
 - B. Muscles of the hip joint and pelvic girdle
 - 1. Location and action
 - 2. Origin and insertion
 - 3. Palpation and innervation
 - 4. Application, strengthening, and flexibility
- IX. The Knee Joint
 - A. Bones, nerves, joints and movement of the knee joint
 - B. Muscles of the knee joint
 - 1. Location and action
 - 2. Origin and insertion
 - 3. Palpation and innervation
 - 4. Application, strengthening, and flexibility
- X. The Ankle and Foot Joints
 - A. Bones, nerves, joints and movement of the ankle and foot joints
 - B. Muscles of the ankle and foot joint
 - 1. Location and action
 - 2. Origin and insertion
 - 3. Palpation and innervation
 - 4. Application, strengthening, and flexibility
- XI. The Trunk and Spinal Column
 - A. Bones, nerves, joints and movement of the trunk and spinal column
 - B. Muscles of the trunk and spinal column
 - 1. Location and action
 - 2. Origin and insertion
 - 3. Palpation and innervation
 - 4. Application, strengthening, and flexibility
- XII. Muscular Analysis of Trunk and Lower Extremity Exercises
 - A. Lower extremity activities
 - B. Analysis of movement
 - C. Analysis of lower body exercises

Assignment:

- 1. Read 10-25 pages per week in textbook
- 2. 1-3 written assignments based on textbook readings
- 3. 1-3 written and/or oral exercise analysis reports
- 4. 1-3 quizzes
- 5. 2-4 exams

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written homework, Textbook Assignments, Written Analysis and Reports

Writing
10 - 40%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

None

Problem solving
0 - 0%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Essay

Exams
40 - 70%

Other: Includes any assessment tools that do not logically fit into the above categories.

Participation, attendance and weekly reading

Other Category
10 - 20%

Representative Textbooks and Materials:

Manual of Structural Kinesiology, 19th Edition R.T. Floyd, McGraw-Hill, 2014
Instructor Prepared materials
