## **COURSE CONTENT**

**Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Describe major theories, principles, and trends that address the process of aging, dying, death, and bereavement from cross-cultural, historical, and contemporary perspectives.
2. Examine the role of ethnicity, gender, socioeconomic status, and historical circumstances when dealing with loss, aging, dying, and death.

**Objectives:**

At the conclusion of this course, the student should be able to:

1. Describe current trends in life expectancies, demographics, and attitudes toward adulthood, "old age," death and dying.
2. Compare and contrast prominent theories on adult development and aging.
3. Summarize age-related physical diseases and psychological problems.
4. Examine how the process of aging affects intelligence, memory, creativity, problem-solving and decision-making skills.
5. Describe different types of intimate partnerships in adulthood.
6. Examine the role of gender, socioeconomic status, personality, and health on choice of work and retirement.
7. Provide a list of stressors encountered by the aging person and generate ways to ameliorate the stress.
8. Discriminate among concepts of suicide, assisted-suicide, and euthanasia; and summarize death/burial rituals and the grieving process following death.
9. Identify a variety of modes/types of death and review the bereavement, grief and mourning process of the survivor.
10. Describe the funeral system, with emphasis in death notification, funeral service selection and cost, and body disposition.

**Topics and Scope:**

- I. Defining the Journey
  - A. Some Assumptions

- B. Definitions
