COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Describe and demonstrate the proper handling and techniques for routine veterinary exams, emergency triage and common diagnostic procedures.
2. Describe and discuss routine preventative care including vaccinations, nutritional support, and age-related medical needs.
3. Discuss and demonstrate the preparation and protocols for common hospitalized patient support procedures including recumbency care, intravenous catheterization, general emergency care, and euthanasia.

Objectives:

At the conclusion of this course, the student should be able to:

1. Employ proper techniques for restraint of small animals.
2. Perform and describe the process of a basic physical exam including vital sign monitoring.
3. Describe and evaluate proper technique for inserting IV catheters.
4. Discuss proper preventative medicine protocols including vaccination.
5. Describe proper procedures and advantages for common routes of medication administration including oral, subcutaneous, intramuscular and topical medication administration.
6. Discuss basic nutritional needs of domestic companion animals including during differing life stages, medical conditions, and for weight loss.
7. Recognize and prepare for common life-threatening small animal medical emergencies.
8. Apply proper medical records protocol in a clinical setting.
9. Describe considerations when developing a fluid therapy plan and discuss the attributes of fluid products.
10. Demonstrate hydration assessment of canine and feline patients.

11. Discuss euthanasia including appropriate indications for euthanasia, assisting the veterinarian in the process.
12. Describe the normal grieving process, and assist clients with grieving.
13. Discuss and prepare for the needs of hospitalized and recumbent patients.

Topics and Scope:

- I. Medical Record Keeping
 - A. Signalment and Medical History
 - B. Subjective-Objective Assessment Plan (SOAP) format
 - C. Laws and recording protocols
- II. Patient Restraint
 - A. Canine techniques
 - B. Feline techniques
 - C. Behavioral assessment and handling safety
 - D. Muzzles and restraint equipment
 - E. Restraint/directional terminology
- III. Physical Examination
 - A. Body systems-based examination
 - B. Vital sign assessment including Auscultation
 - C. Hydration assessment
 - D. Handling to assist with examination or sample collection
- IV. Preventative Medicine
 - A. Preventable diseases
 - B. Vaccination protocols
 - C. Vaccination handling and administration
 - D. Client education
- V. Medication Administration
 - A. Medication preparation
 - B. Forms of medication
 - C. Drug dosage calculations
 - D. Subcutaneous administration
 - E. Intramuscular administration
 - F. Intravenous administration
- VI. Fluid Therapy
 - A. Patient fluid balance
 - B. Routes of administration
 - C. Fluid calculations
 - D. Administration sets and pumps
 - E. Patient hydration monitoring
- VII. Intravenous catheters
 - A. Relevant vascular anatomy
 - B. Catheter insertion and securing technique
 - C. Catheter monitoring and maintenance
- VIII. Emergency Care
 - A. Emergency Recognition
 - B. Triage exam and prioritization
 - C. Common emergency interventions
 - D. First aid
 - E. CardioPulmonary Cerebral Resuscitation
- IX. Special Needs Patients
 - A. Recumbency care

- B. Neonatal care
- C. Geriatric care
- X. Nutrition
 - A. Labels and manufacturer regulations
 - B. Nutrients and common ingredients
 - C. Nutritional needs based on life stage
 - D. Nutritional needs based on disease status
- XI. Euthanasia
 - A. Quality of life assessment
 - B. Recommended procedures and assisting the veterinarian
 - C. Grief process and assisting the client

Assignment:

1. Reading in texts and handouts (20-40 pages/week)
2. Completing and evaluation of mock medical records and protocols.
3. Two calculation worksheets
4. Creation and evaluation of client education materials and hospital protocols
5. Observations in clinical settings
6. Participation: patient handling and restraint, physical examinations, vaccinations and medication administration, client communication and patient discussion
7. Midterm(s) (up to 2) and final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Medical protocols, client education handouts, clinical observation summaries, medical record completion

Writing
10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Calculation worksheets, evaluating medical records and client handouts, critiquing medical protocols

Problem solving
10 - 20%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Midterm(s) and Final Exam

Exams
50 - 60%

Other: Includes any assessment tools that do not logically fit into the above categories.

Clinical observations, participation

Other Category
10 - 20%
