COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Analyze the CSA model for operational efficiency.
2. Demonstrate understanding of harvesting, packaging, and storage methods appropriate to in-season crops.
3. Identify and analyze potential markets in the community.

Objectives:

At the conclusion of this course, the student should be able to:

1. Compare and contrast different operational and marketing models of Community Supported Agriculture.
2. Identify field management techniques necessary to bring a crop to full production.
3. Build and strengthen skills in harvesting, packaging, and postharvest techniques of in-season crops.
4. Demonstrate final harvest methods of in-season crops.
5. Discuss various crop rotation and planning needs for seasonal progression of crops.
6. Generate content for and discuss the utility of a customer newsletter for farms.

Topics and Scope:

- I. Overview of CSA
 - A. History of CSA
 - B. Shone Farm CSA
 - C. CSA models
- II. Regulatory Requirements of a CSA
 - A. Food Safety requirements

- B. County and State permitting requirements
- III. CSA Infrastructure
 - A. Packhouse design
 - B. Box storage and delivery options
 - C. Pricing and billing structures
- IV. Review of Processes Necessary to Bring CSA Crop to Necessary Production Levels
 - A. Supplies and equipment necessary for CSA operations
 - B. Seasonal planning considerations to meet CSA crop demand
 - C. Weekly planning and forecasting
 - D. Overview of seasonal crop rotation procedures appropriate to the CSA model
- V. Demonstration of Various Crop Harvesting Techniques
 - A. Crop specific harvest methods
 - B. Appropriate use of specific harvesting tools
- VI. Demonstration of Various Crop Postharvest and Packing Techniques
 - A. Crop specific postharvest requirements
 - B. Crop specific preparation and packing requirements
- VII. Maintaining Customer Relations
 - A. Weekly newsletters
 - B. On-farm events and/or promotions
- VIII. Review of the Overall Effectiveness of the CSA Operation
 - A. Crop production
 - B. Postharvest handling practices
 - C. Marketing
 - D. Financial viability

Concepts presented in lecture are applied and practiced in lab.

Assignment:

Lecture Related Assignments:

1. Food Handlers Card application exercises
2. Develop a CSA model plan
3. Quizzes (5 – 10)
4. One midterm and 1 final

Lab Related Assignments:

1. Weekly harvest, postharvest handling, packing skills activities and demonstrations
2. Weekly lab activity journals

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Weekly lab activity journals, CSA model plan
--

Writing 25 - 35%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Food Handlers Card application exercises

Problem solving
10 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Harvest, postharvest handling, packing skills activities and demonstrations

Skill Demonstrations
20 - 35%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes, midterm and final

Exams
30 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
