COURSE CONTENT

Student Learning Outcomes:

Upon completion of the course, students will be able to:

1. Employ sustainable garment construction practices to repurpose and alter garments and accessories.
2. Identify sustainable fibers and environmentally conscious manufacturing processes.

Objectives:

Students will be able to:

1. Analyze the potential impacts that conventional textile production and garment manufacturing have on the environment.
2. Understand zero waste garment design and pattern techniques.
3. Alter and repurpose garments to achieve desired fit and style.

Topics and Scope:

I. Sustainability and Environmental Consciousness

- A. Garment life cycle
- B. Fiber cultivation
- C. Production and manufacturing practices
- D. Fair labor practices
- E. Consumer use and care
- F. Biodegradability and recycling

II. Alterations

- A. Equipment tools and supplies
- B. Measuring and fitting
- C. Marking and pressing
- D. Commercial alterations
- E. Service policies and pricing

III. Repurposing

- A. History of rationing clothing
- B. Upcycling and combining garments and accessories
- C. Deconstruction and construction techniques
- D. Designers and manufacturers

IV. Zero Waste

- A. Historical perspective
- B. Textile waste
- C. Commercial pattern companies
- D. Slopers/blocks and markers
- E. Designers and manufacturers

All topics are covered in the lecture and lab portions of the course.

Assignment:

Lecture Assignments:

1. Read approximately 10-20 pages per week from textbooks, periodicals, and online sources
2. Quizzes (3-4)
3. Research project and presentation: zero waste or upcycle designer

Lab assignments:

1. Construct 5-6 machine and hand-sewn alteration, fastener, and hem sample assignments
2. Complete 1-2 alteration project(s): applying basic to advance deconstruction and construction techniques, on various categories of garments
3. Complete 1-2 repurposing project(s)

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written research project and/or presentation

Writing
15 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Projects: construct 1-2 alteration project(s) and 1-2 repurposed garment(s)

Problem solving
30 - 45%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Machine and hand-sewn sample assignments

Skill Demonstrations
20 - 30%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes

Exams
10 - 15%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Other Category
10 - 20%
