### **Catalog Description:**

Students will learn about fruit tree and berry vine selection, planting, and care for small-scale orchard or home garden. Includes desirable varieties, site selection and preparation, soil and fertility management, pruning and training methods, harvest techniques and pest management. Emphasis on organic production methods.

### **Prerequisites/Corequisites:**

**Recommended Preparation:** Eligibility for ENGL 100 or ESL 100

### **Limits on Enrollment:**

### **Certificate/Major Applicable:**

Both Certificate and Major Applicable

## **COURSE CONTENT**

### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

- 1. Differentiate among the types of fruit trees and berries.
- 2. Identify suitable types of fruit trees and berries for Sonoma County.
- 3. Describe appropriate techniques for pruning, thinning, and harvesting fruit trees and berries.

### **Objectives:**

At the conclusion of this course, the student should be able to:

- 1. Describe planting techniques for fruit trees and berries.
- 2. Identify desirable characteristics of a variety of fruit trees and berries.
- 3. Describe important soil and site characteristics for successful fruit tree and berry production.
- 4. Describe water and nutrient needs of a variety of fruit trees and berries.
- 5. Differentiate among common general pruning practices.
- 6. Describe harvest and storage requirements for various kinds of fruits and berries.

### **Topics and Scope:**

I. Varieties and Types of Fruit Trees and Berries

- A. Fruit trees
  - 1. Dwarf
  - 2. Semi-dwarf
  - 3. Standard
- B. Berries
  - 1. Bush
  - 2. Cane
  - 3. Vine
  - 4. Native
- II. Cultural Care

- A. Site selection
  - 1. Climate and microclimate
  - 2. Soil Types and preparation
  - 3. Chill and heat unit requirements
- B. Planting
  - 1. Methods
  - 2. Post-planting care
- C. Nutrients
  - 1. Requirements
  - 2. Types
  - 3. Application methods
- D. Water
  - 1. Soil/water relationship
  - 2. Watering requirements
  - 3. Irrigation methods
  - 4. Water use efficiency
- E. Pest control methods
  - 1. Insects and mites
  - 2. Plant diseases
  - 3. Vertebrates
- F. Weed management
- G. Pruning and training
  - 1. Pruning methods
  - 2. General training (central leader, modified center leader, vase)
  - 3. Specific training (specie specific, espalier, hedges, establishment)
- H. Fruit thinning

III. Harvest Techniques and Storage Requirements

IV. Direct Marketing of Fruit and Berries

All topics covered in lecture are also covered in lab.

### Assignment:

1. One design project: develop a written plan or presentation on selection, planting, care, harvest and related costs for one or more varieties of fruit tree or berry with minimum of five plants

- 2. Weekly reading (10 20 pages)
- 3. Quizzes (3 6)
- 4. Final exam (1)
- 5. Lab reports (4 8)
- 6. Weekly lab activities
- 7. Field trip(s) (1 2) and field trip report(s) for each

## Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

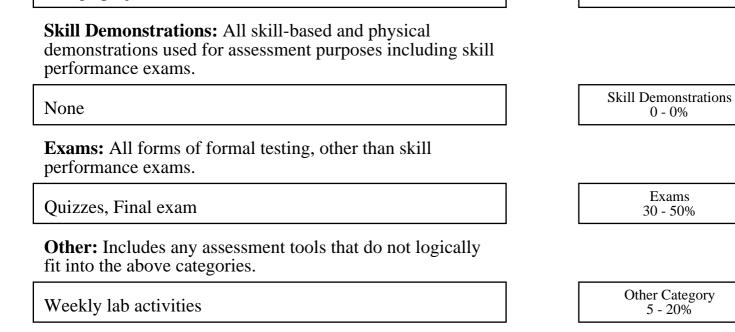

Lab reports, Design project, Field trip report(s)

Writing 30 - 50% **Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

#### Design project

### **Representative Textbooks and Materials:**

The Home Orchard – Growing your Own Deciduous Fruit and Nut Trees. University of California Agriculture and Natural Resources Publication 3485. ANR Press. 2007 (classic) Instructor prepared materials.
