COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Apply arithmetic calculations involving fractions, decimals, ratio, and proportion to food preparation and service
2. Analyze word problems related to the culinary field and apply effective strategies for solving them
3. Use estimation and a scientific calculator, as appropriate, to solve arithmetic problems relating to the culinary field

Objectives:

Upon completion of the course, students will be able to:

1. Perform arithmetic computations involving fractions and decimals
2. Solve ratio and proportion word problems using appropriate setup
3. Use estimation and "mental math" for quick calculations and checking for reasonable solutions
4. Apply strategies for solving word problems to typical situations in food service
5. Simplify and evaluate calculations using a scientific calculator

Topics and Scope:

I. Arithmetic Skills

A. Concept introduction as applied to food service

1. Whole numbers and place value
2. Rounding and estimation
3. Decimals
4. Fractions

B. Operations: Addition, Subtraction, Multiplication, Division

1. Whole Numbers
2. Decimals
3. Fractions

II. Food Service Application Problems

A. Strategies for solving word problems

1. Translating words to symbols
2. Word problem set-up
3. Estimation and "mental math" for checking
4. Using a scientific calculator appropriately

C. Ratio and proportion

1. Ingredient quantities
2. Basic recipe conversions

III. Measurement Systems in the Culinary Field

A. U.S. Customary System

1. Volume as applied to food service (e.g., quart, cup, tablespoon)
2. Weight (e.g., pounds, ounces)

B. Metric, as appropriate

Assignment:

1. Assignments providing practice and reinforcement for arithmetic skills
2. Individual and group work on application of arithmetic skills and problem solving strategies related to the culinary field
3. In-class quizzes (3 to 4)
4. Final unit test

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None

Writing
0 - 0%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Arithmetic problems; application of skills

Problem solving
40 - 50%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and unit test: multiple choice, fill-in, short answer

Exams
40 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation in class activities; group work

Other Category
5 - 10%

Representative Textbooks and Materials:

Instructor prepared materials
