# CID:

## **Certificate/Major Applicable:**

Both Certificate and Major Applicable

# **COURSE CONTENT**

## **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Demonstrate business math computational skills.

2. Perform quantitative operations essential for improving planning, decision-making, and organizational performance.

3. Analyze and compare financial and statistical data.

# **Objectives:**

At the conclusion of this course, the student should be able to:

1. Calculate and convert fundamental math operations in a variety of common modes.

2. Design, manipulate, and solve basic equations.

3. Formulate and solve quantitative operations in the areas of purchasing, pricing, depreciation, and inventory management.

- 4. Analyze data, including financial statements.
- 5. Calculate and compare loans and investments.
- 6. Assemble, arrange, and calculate statistical data.

# **Topics and Scope:**

- I. Business Mathematical Operations
  - A. Numerical operations
  - B. Solving basic financial equations and algorithms
  - C. Simple vs. compound interest
- II. Mathematics for Business
  - A. Purchasing/ payment discounts
  - B. Pricing, markups/markdown
  - C. Inventory, overhead and depreciation
  - D. Allocating costs and distribution of profits
  - E. Financial statement analysis
  - F. Calculating and amortizing debt payments

G. Comparing investments

## III. Mathematics for Presentation and Analysis of Business Information

- A. Financial statements/ reports
- B. Elementary statistics
- C. Basic graphical analysis of information
- IV. Stocks and Bonds (Optional)
  - A. Yield, earnings per share, price/earnings ratio, dividends
  - B. Bond yield and net asset value
- V. Payroll (Optional)
  - A. Gross/ net earnings
  - B. Deductions and reporting

## Assignment:

- 1. Assigned reading (20-30) pages per week
- 2. Math related activities and projects
- 3. Problem solving exercises in content areas
- 4. Quizzes/tests (2-6) and final exam

## Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Problem solving exercises and math activities and projects

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

**Exams:** All forms of formal testing, other than skill performance exams.

Quizzes/ tests, final exam

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation

Writing 0 - 0%

Problem solving 10 - 40%

Skill Demonstrations 0 - 0%

> Exams 50 - 80%

Other Category 5 - 15%

**Representative Textbooks and Materials:** Practical Business Math Procedures. 13th Ed. Slater, Wittry. McGraw-Hill-Irwin. 2019 Instructor prepared materials
