Catalog Description:
In this course, students will study radiographic anatomical positioning and image analysis. Instruction includes lecture, positioning demonstrations, and practice. Students learn to perform radiographic positioning procedures of the skull, facial bones, sinuses, mandible, and temporomandibular joints. Evaluation of radiographic images for diagnostic quality.

Prerequisites/Corequisites:
Course Completion of RADT 61B and Concurrent Enrollment in RADT 71C

Recommended Preparation:

Limits on Enrollment:
Acceptance into program

COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Competently perform radiographic positioning procedures of the skull, facial bones, sinuses, mandible, and temporomandibular joints.

Objectives:

At the conclusion of this course, the student should be able to:

1. Perform correct positioning for the skull, facial bones, sinuses, mandible, and temporomandibular joints.
2. Correctly manipulate the radiographic equipment and accessories.
3. Practice safe radiation protection measures for patients, self, and others.
4. Critically analyze images to include technical criteria, positioning criteria, anatomical identification, and diagnostic quality.

Topics and Scope:

All topics presented in lecture and applied in lab:

I. Principles of Radiographic Positioning and Anatomy

A. Skull

B. Facial bones

C. Temporomandibular joints

D. Mandible

E. Sinuses

II. Landmarks of the Head and Face

III. Principles of Radiation Protection to Patient, Technologist, and Ancillary Personnel

IV. Principles of Safe Manipulation of the Head of a Trauma Patient

V. Criteria for Image Analysis

- A. Technical criteria
- B. Positioning criteria
- C. Anatomical identification
- D. Acceptance of diagnostic quality

Assignment:

Lecture-Related Assignments:

1. Reading and study of anatomy and positioning modules (6-8)
2. Weekly writing assignments and chapter worksheets (6-8)
3. Quizzes (4-6)
4. Midterm and final exam

Lab-Related Assignments:

1. Completion of written analyses of images (6-8)
2. Completion of positioning check-offs
3. Competency demonstrations (20-25)
4. Completion of a final practical competency demonstration

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Written assignments and chapter worksheets

Writing
5 - 15%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Image analyses

Problem solving
5 - 15%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Competency demonstrations; final practical competency demonstration

Skill Demonstrations
30 - 40%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes; midterm and final exam

Exams
30 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

None

Other Category
0 - 0%
