## **COURSE CONTENT**

### **Student Learning Outcomes:**

At the conclusion of this course, the student should be able to:

1. Identify a variety of models and theories of addiction and other issues related to substance abuse.
2. Recognize behavioral, psychological, health, and social effects of substance abuse on the user and the user's family and friends.
3. Recognize how the family, social networks, and community systems are factors in addiction prevention.
4. Interpret research and outcome data.

### **Objectives:**

At the conclusion of this course, the student should be able to:

1. Compare and contrast models and theories of addiction.
2. Evaluate past and present social policy conflicts regarding substance use in American society.
3. Describe the most generally accepted and scientifically supported models of treatment in recovery, relapse prevention and other substance-related issues.
4. Examine the importance of family, social network and community support in alcohol and other substance recovery.

### **Topics and Scope:**

- I. Accepted and Scientific Models and Theories of Addiction
  - A. Etiological, moral, disease, and behavioral theories of addiction
  - B. Emerging research
