COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Identify aspects of State and Federal laws that apply to healthcare practice.
2. State characteristics of medical ethics relating to healthcare.
3. Apply ethical principles to ethical dilemmas.

Objectives:

At the conclusion of this course, the student should be able to:

1. Describe the principles, duties, and virtues of a healthcare professional.
2. Describe family dynamics in a cultural, social, ethnic and lifestyle context as it relates to our family of origin ethical development.
3. Exhibit professional skills and competence caring for a diverse population in a healthcare environment.
4. Define the American Registry of Radiologic Technologists (ARRT) code of professional ethics.
5. Identify ethical violations and describe sanctions.
6. Describe how allocation and poverty affect access to quality healthcare.
7. Define the Patient's Bill of Rights as determined by the American Hospital Association.
8. Describe legal doctrines and professional standards as regulated by state and federal agencies.
9. Describe ways to maintain patient confidentiality as defined by Health Insurance Portability and Accountability Act (HIPAA) regulations and identify situations that violate HIPAA.
10. Define the difference between civil and criminal liability.

11. Describe the radiologic technologist's role regarding mandated reporting laws.
12. Define types of patient consent and describe the radiologic technologist's role to obtain informed consent.

Topics and Scope:

 - J. State Worker's Compensation Statute
 - K. "Whistleblowing"

Assignment:

1. Reading (40 pages per week average)
2. Complete chapter study questions and critical thinking exercises (20-25 per chapter)
3. Complete case studies (1-2 per week)
4. Research, analyze, and compose an evidence-based narrative that addresses an ethical or medico- legal issue found in a patient care setting (2-3 pages)
5. Oral presentation on an ethical or medical-legal issue found in a patient care setting (5-10 minutes)
6. Quizzes (10-12)
7. Midterm exam
8. Final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Chapter assignments; narrative paper

Writing
20 - 25%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Case studies

Problem solving
20 - 25%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes; midterm exam; final exam

Exams
30 - 40%

Other: Includes any assessment tools that do not logically fit into the above categories.

Oral presentation

Other Category
10 - 20%
