COURSE CONTENT

Student Learning Outcomes:

At the conclusion of this course, the student should be able to:

1. Demonstrate competence as a Dietetic Technician in managing food service for an inpatient setting, including meal planning, food ordering, and meal delivery.
2. Participate as a team member in the development and use of Nutrition Care Plans (NCP).
3. Use professional, legal, and ethical dimensions as a basis for decision making in dietetic practice.

Objectives:

At the conclusion of this course, the student should be able to:

1. Participate in screening and interviewing clients/patients for nutritional needs.
2. Apply nutrient standards to assess nutrient needs and write nutrition care plans for a variety of clients.
3. Conduct an individual or group education and follow up for acceptance and understanding.
4. Assist with standard enteral feedings and implement transition feeding plans in medically stable clients.
5. Contribute to interdisciplinary team patient care conferences representing food and nutrition services and contribute to interdepartmental communication in the healthcare setting.
6. Assist Registered Dietitian with nutrition assessment of patients with complex medical conditions.
7. Refer clients/patients to other dietetic professionals or other disciplines when patient needs

- are beyond the Dietetic Technician, Registered scope of practice.
8. Order, receive, and safely store food for an inpatient food service operation.
 9. Follow and document compliance with state and federal healthcare food service rules and regulations and propose actions for continuous quality improvement in a food service operation.
 10. Demonstrate competence as a dietetic supervisor in managing food and nutrition employees and organizing resources and services in a food service organization.
