### **Catalog Description:**

Introduction to basic physical and biological sciences, including chemistry, physics, anatomy, physiology, microbiology, metric system and basic biomath.

**Prerequisites/Corequisites:** 

**Recommended Preparation:** Eligibility for ENGL 100 or ESL 100.

### **Limits on Enrollment:**

### **Schedule of Classes Information:**

Description: Intro to basic physical & biological sciences. Chemistry, physics, anatomy, physiology, microbiology, metric system & basic biomath. (Grade or P/NP) Prerequisites/Corequisites: Recommended: Eligibility for ENGL 100 or ESL 100. Limits on Enrollment: Transfer Credit: CSU; Repeatability: Two Repeats if Grade was D, F, NC, or NP

## CID:

## **Certificate/Major Applicable:**

Both Certificate and Major Applicable

# **COURSE CONTENT**

### **Outcomes and Objectives:**

The students will:

- 1. Develop a deeper and broader perspective of the intricacies of human body structure and function.
- 2. As a result of 1, significantly increase their appreciation, not only for the human body, but for the rationale behind practices and procedures currently employed by clinical medical science.
- 3. As a result of 1, acquire a relatively detailed knowledge which can be recalled, as needed, in future career-related course work, and in clinical learning situations.
- 4. As a result of 1, develop and experience a greater sense of confidence in functioning within clinical settings.
- 5. Further develop a sense of academic integrity and respect for scienctific reasoning, as acquired through repeated observations of the instructor's behavior.
- 6. Acquire a clearer perspective of his own academic potential in relation to his chosen career.
- 7. Increase his capacity to assimilate, digest, and correlate relatively large amounts of information in a relatively short span of time, presumedly increasing his potential to benefit more from future training sessions.

# **Topics and Scope:**

- 1. Basic principles of chemistry.
- 2. Basic principles of physics.
- 3. Mathematical concepts.
- 4. Anatomy and physiology. A. General.
  - B. Skeletal system.
  - C. Muscular system.

- D. Neuroendocrine system.
- E. Cardiovascular system.
- F. Respiratory system.
- G. Digestive system.
- H. Renal system.
- I. Reproductive systems.
- J. Integumentary system.
- J. Principles of immunology.

### Assignment:

ÿAs this is a begining level college course, most enrollees enter wi h

## Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Quizzes, Exams

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Matching items, Completion

**Other:** Includes any assessment tools that do not logically fit into the above categories.

SHORT ESSAY

Other Category 0 - 20%
