Catalog Description:
Lecture, demonstration and practical lab experience in the operation, troubleshooting and repair of the ignition, fuel and pollution control systems of late model automobiles. Emphasis on the proper use of tools and diagnostic equipment. Course prepares students to pass the A.S.E. (Automotive Service Excellence) Engine Performance Certification Exam and enter the automotive trade as an apprentice level technician specializing in engine performance and emission control.

Prerequisites/Corequisites:

Recommended Preparation:
Course Completion of AUTO 56 and Course Eligibility for ENGL 100 OR Course Eligibility for EMLS 100 (or ESL 100)

Limits on Enrollment:

Schedule of Classes Information:
Description: Operation, troubleshooting, and repair of the ignition, fuel, and pollution control systems of late model automobiles. Prepares students to pass the A.S.E. (Automotive Service

Excellence) Engine Performance Certification Exam and enter the automotive trade as an apprentice level technician specializing in engine performance and emission control. (Grade Only)

Prerequisites/Corequisites:

Recommended: Course Completion of AUTO 56 and Course Eligibility for ENGL 100 OR Course Eligibility for EMLS 100 (or ESL 100)

Limits on Enrollment:

Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Both Certificate and Major Applicable

COURSE CONTENT

Outcomes and Objectives:

Upon completion of this course, students will be able to:

1. Evaluate and repair engine systems based on an application of engine operation principles.
2. Test, diagnose, and repair engine mechanical components.
3. Explain the operation of automotive ignition, fuel, and integrated electronic engine controls, including OBDII (On Board Diagnostics, generation II).
4. Analyze and diagnose common problems and repair automotive ignition, fuel, and integrated electronic engine controls, including OBDII.
5. Take the A.S.E. (Automotive Service Excellence) Engine Performance Certification Exam and enter the automotive trade as an apprentice level technician specializing in engine performance and emission control.

Topics and Scope:

1. Review of basic engine operation, lubrication and cooling systems.
 - a. Principles of engine operation.
 - b. Testing engine mechanical components.
2. Ignition systems operations and service.
 - a. Ignition system principles and components.
 - b. Distributor systems.
 - c. Waste-spark systems.

- d. Coil-on-plug systems.
- e. Ignition troubleshooting and diagnosis.
- 3. Computer control systems - theory and principles of operation.
 - a. Sensor networks.
 - b. Actuators and modules.
 - c. Scan tool testing.
- 4. Fuel system operation and service - principles of operation (atmospheric, pressure and vacuum)
 - a. Air induction system - normally aspirated and forced induction.
 - b. Fuel supply systems.
 - c. Fuel metering systems.
 - d. Testing, inspecting and troubleshooting fuel systems.
 - e. Gas analyzer, scope testing and scan tool data.
- 5. Emission control systems.
 - a. Crankcase.
 - b. Evaporative.
 - c. Tail pipe.
- 6. Exhaust system.
 - a. Components.
 - b. Inspection.
 - c. Exhaust gas recirculation systems.
 - d. Other emission controls.
 - e. Smog check procedures - introduction.

Assignment:

- 1. Students will be required to keep a notebook of all class assignments and class notes that will be graded for completeness and organization.
- 2. Reading: 50 pages per week.
- 3. Class performances and performance exams: In the lab, students will be evaluated on their ability to follow industry approved diagnostic and repair procedures in a reasonable amount of time.
- 4. Component identification.
- 5. Lab reports: Complete work orders, diagnostic sheets, parts orders, and time sheets correctly and in a neat and readable manner.
- 6. Three unit tests, midterm, and final exam.

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Notebook.

Writing 5 - 10%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Lab reports

Problem solving 5 - 20%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

Class performances, Performance exams, component identification

Skill Demonstrations
30 - 50%

Exams: All forms of formal testing, other than skill performance exams.

Multiple choice, True/false, Completion

Exams
30 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Attendance and participation.

Other Category
10 - 15%
