#### MATH 58 Course Outline as of Fall 2006

# **CATALOG INFORMATION**

Dept and Nbr: MATH 58 Title: TRIGONOMETRY

Full Title: Trigonometry Last Reviewed: 2/10/2020

Units		Course Hours per Week		Nbr of Weeks	<b>Course Hours Total</b>	
Maximum	3.00	Lecture Scheduled	3.00	17.5	Lecture Scheduled	52.50
Minimum	3.00	Lab Scheduled	0	17.5	Lab Scheduled	0
		Contact DHR	0		Contact DHR	0
		Contact Total	3.00		Contact Total	52.50
		Non-contact DHR	0		Non-contact DHR	0

Total Out of Class Hours: 105.00 Total Student Learning Hours: 157.50

Title 5 Category: AA Degree Applicable

Grading: Grade Only

Repeatability: 00 - Two Repeats if Grade was D, F, NC, or NP

Also Listed As:

Formerly:

### **Catalog Description:**

Topics from trigonometry including trigonometric functions and their graphs, trigonometric identities, trigonometric equations, inverse trigonometric functions, complex numbers, polar coordinates, parametric equations, vectors, and applications.

# **Prerequisites/Corequisites:**

Completion of MATH 155 or higher (V1)

# **Recommended Preparation:**

No advisories.

#### **Limits on Enrollment:**

### **Schedule of Classes Information:**

Description: Topics from trigonometry including trigonometric functions and their graphs, trigonometric identities, trigonometric equations, inverse trigonometric functions, complex numbers, polar coordinates, parametric equations, vectors, and applications. (Grade Only)

Prerequisites/Corequisites: Completion of MATH 155 or higher (V1)

Recommended: No advisories.

Limits on Enrollment:

Transfer Credit: CSU;

Repeatability: Two Repeats if Grade was D, F, NC, or NP

Not Certificate/Major Applicable

## **COURSE CONTENT**

# **Outcomes and Objectives:**

Upon successful completion of the course, students will be able to:

- 1. Define the trigonometric functions.
- 2. Use radian measure to find arc length, sector area, and linear and angular velocity.
- 3. Verify trigonometric identities.
- 4. Solve, both graphically and analytically, equations involving trigonometric functions.
- 5. Graph trigonometric functions and shifts, reflections and stretches of these functions.
- 6. Define and graph the inverse trigonometric functions.
- 7. Apply trigonometric functions and identities to solve applications and modeling problems.
- 8. Solve right and oblique triangles using the trigonometric functions and the Laws of Sine and Cosine.
- 9. Represent complex numbers in, and perform operations using, trigonometric form.
- 10. Use vectors to model applications in mathematics and science.

# **Topics and Scope:**

Instructional methodology may include, but is not limited to: lecture, demonstrations, oral recitation, discussion, supervised practice, independent study, outside project or other assignments.

- I. Trigonometric Functions
  - A. Radian and degree measures of angles
    - 1. Arc length
    - 2. Area of a sector
    - 3. Linear and angular velocity
  - B. Right triangle and unit circle definitions
  - C. Characteristics of trigonometric functions
- II. Identities and Conditional Equations
  - A Fundamental identities
  - B. Sum and difference identities
  - C. Related identities and their derivations
  - D. Conditional trigonometric equations
- III. Graphical Representation of Trigonometric Functions
  - A. Amplitude
  - B. Period
  - C. Phase (horizontal) shifts
  - D. Vertical shifts
- IV. Inverse Functions
  - A. Definition
  - B. Properties of inverse functions
  - C. Inverse trigonometric functions and their graphs
- V. Solutions of Triangles
  - A. Right triangles
  - B. Oblique triangles
  - C. Laws of Sines and Cosines
  - D. Applications
- VI. Complex Numbers, Polar Coordinates, and Parametric Equations
  - A. Definitions
  - B. Operations
  - C. Graphical representation of complex numbers
  - D. DeMoivre's Theorem
  - E. Polar coordinates
  - F. Parametric equations
- VII. Two Dimensional Vectors
  - A. Geometric and analytic definitions
  - B. Algebra of vectors
  - C. Trigonometric form of vectors
  - D. Dot product
  - E. Applications

#### **Assignment:**

- 1. Daily reading outside of class (approximately 0-50 pages per week)
- 2. Problem set assignments from required text(s)or supplementary materials chosen by the instructor
- 3. Exams and quizzes
- 4. Projects

## Methods of Evaluation/Basis of Grade:

**Writing:** Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

None, This is a degree applicable course but assessment tools based on writing are not included because problem solving assessments are more appropriate for this course.

Writing 0 - 0%

**Problem Solving:** Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Homework problems

Problem solving 5 - 20%

**Skill Demonstrations:** All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations 0 - 0%

**Exams:** All forms of formal testing, other than skill performance exams.

Multiple choice, Free response exams, quizzes

Exams 70 - 95%

**Other:** Includes any assessment tools that do not logically fit into the above categories.

Projects (e.g., computer projects or measurement activities)

Other Category 0 - 10%

### **Representative Textbooks and Materials:**

Text(s) required of each student will be selected by the department, a committee of the department, or the responsible instructor from the books currently available. Choices in the past have included: Trigonometry Enhanced With Graphing Utilities (4th). Sullivan, Michael and Sullivan III, Michael. Prentice Hall: 2006.

Trigonometry (1st). Dugopolski, Mark. Addison Wesley: 2003.
